David L. Andrews is Professor of Chemical Physics at the University of East Anglia (UEA) in the United Kingdom, where his group conducts research on fundamental photonics, quantum electrodynamics, the theory of optomechanical forces, optical vortices, nonlinear optics, energy harvesting, and molecular energy transport. His career began with a degree in chemistry at University College London, followed by doctoral studies and then a postdoctoral appointment in the Department of Mathematics, before he moved to UEA in 1979. Andrews was elected a Fellow of the Royal Society of Chemistry in 1988, a Fellow of the Institute of Physics in 1999, and a Fellow of SPIE in 2006. He now has over 330 papers and 15 books to his name, including the textbook *Lasers in Chemistry* (Springer, 1997) and most recently, a four-volume series *Photonics* (Wiley, 2015), on which he served as editor. Andrews is heavily involved in international conference organization and has served as Chair for numerous symposia and conferences. He has presented invited lectures extensively in North America and further afield in 20 different countries around the world.

James G. Grote is a principal electronics research engineer with the Air Force Research Laboratory, Materials and Manufacturing Directorate at Wright-Patterson Air Force Base, Ohio, USA, where he conducts research in polymer- and biopolymer-based opto-electronics. He is also an adjunct professor at the University of Dayton and University of Cincinnati. He received his B.S. degree in electrical engineering from Ohio University and both his M.S. and Ph.D. degrees in electrical engineering from the University of Dayton, with partial study at the University of California, San Diego. He was a visiting scholar at the Institut d'Optique, Université de Paris Sud in the summer of 1995 and a visiting scholar at the University of Southern California, the University of California in Los Angeles, and the University of Washington in 2001. Dr. Grote is an Air Force Research Laboratory Fellow, a Fellow of SPIE, Optical Society of America (OSA), and European Optical Society (EOS), and a senior member of the Institute of Electrical and Electronics Engineers (IEEE). In addition, he received Doctor Honoris Causa from the Politehnica University of Bucharest in 2010 and was inducted into the Ohio University's Fritz. J. and Delores H. Russ College of Engineering and Technology's Academy of Distinguished

Graduates in 2014. Dr. Grote has coauthored more than 170 journal and conference papers, including 1 book and 5 book chapters, has served as editor for more than 25 conference proceedings and journal publications, has coauthored 10 patents, and has presented more than 120 papers and seminars, many of which have been keynote or invited. Dr. Grote has served as Chair for numerous international symposiums and conferences.
