SPIE

Volume 8467

Proceedings of SPIE 0277-786X, V.8467

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Nanoepitaxy: Materials and Devices IV, edited by Nobuhiko P. Kobayashi, A. Alec Talin, M. Saif Islam,
Proc. of SPIE Vol. 8467, 846701 · © 2012 SPIE · CCC code: 0277-786/12/$18 · doi: 10.1117/12.2011782

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:
Author(s), "Title of Paper," in *Nanoepitaxy: Materials and Devices IV*, edited by Nobuhiko P. Kobayashi, A. Alec Talin, M. Saif Islam, Proceedings of SPIE Vol. 8467 (SPIE, Bellingham, WA, 2012) Article CID Number.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

vii *Conference Committee*

NANOWIRES I

8467 02 **Biofunctionalization of Si nanowires using a solution based technique** [8467-1]
E. H. Williams, National Institute of Standards and Technology (United States) and George Mason Univ. (United States); A. V. Davydov, V. P. Oleshko, N. J. Lin, K. L. Steffens, National Institute of Standards and Technology (United States); A. K. Manocchi, U.S. Army Research Lab. (United States); S. Krylyuk, National Institute of Standards and Technology (United States) and Univ. of Maryland, College Park (United States); M. V. Rao, J. A. Schreifels, George Mason Univ. (United States)

8467 03 **Light extraction in individual GaN nanowires on Si for LEDs (Invited Paper)** [8467-2]
J. Chesin, X. Zhou, S. Gradečak, Massachusetts Institute of Technology (United States)

LOW-DIMENSIONAL DEVICES I

8467 0C **MOCVD growth of GaN nanopyramid and nanopillar LED with emission in green to orange color (Invited Paper)** [8467-11]
H.-C. Kuo, National Chiao Tung Univ. (Taiwan); Y.-J. Cheng, Academia Sinica (Taiwan)

8467 0E **Indium phosphide nanowire network: growth and characterization for thermoelectric conversion** [8467-13]
K. J. Norris, J. Zhang, D. Fryauf, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States); A. Rugar, The Harker School (United States); A. Flores, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States); T. J. Longson, Univ. of California, Santa Cruz (United States); A. J. Lohn, N. P. Kobayashi, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States)

ATOMIC LAYER DEPOSITION

8467 0F **Novel optical properties of Ag films deposited by plasma enhanced atomic layer deposition (PEALD) (Invited Paper)** [8467-14]
S. M. Prokes, O. J. Glembocki, E. Cleveland, U.S. Naval Research Lab. (United States)

8467 0H **Plasma enhanced atomic layer deposition of silver thin films for applications in plasmonics and surface-enhanced Raman scattering** [8467-16]
E. R. Cleveland, U.S. Naval Research Lab. (United States) and American Society for Engineering Education (United States); O. Glembocki, S. M. Prokes, U.S. Naval Research Lab. (United States)

NANOWIRES II

8467 0J **Enhanced field ionization current enabled by gold induced surface states to silicon nanowires** [8467-18]
H. Karaagac, M. S. Islam, Univ. of California, Davis (United States)

8467 0L **Graded nanowire ultraviolet LEDs by polarization engineering (Invited Paper)** [8467-20]
S. D. Carnevale, T. F. Kent, The Ohio State Univ. (United States); P. J. Phillips, Univ. of Illinois at Chicago (United States); A. T. M. G. Sarwar, The Ohio State Univ. (United States); R. F. Klie, Univ. of Illinois at Chicago (United States); S. Rajan, R. C. Myers, The Ohio State Univ. (United States)

LOW-DIMENSIONAL MATERIALS II

8467 0R **Heterogeneous integration of epitaxial nanostructures: strategies and application drivers (Invited Paper)** [8467-26]
C. O. Chui, K.-S. Shin, J. Kina, K.-H. Shih, Univ. of California, Los Angeles (United States); P. Narayanan, C. A. Moritz, Univ. of Massachusetts, Amherst (United States)

NANO CHARACTERIZATION

8467 0U **Study on indium phosphide nanowires grown by metal organic chemical vapor deposition and coated with aluminum oxides deposited by atomic layer deposition** [8467-29]
A. J. Lohn, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States); N. Dawson, The Univ. of New Mexico (United States); R. Cormia, Foothill College (United States); D. Fryauf, J. Zhang, K. J. Norris, N. P. Kobayashi, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States)

LOW-DIMENSIONAL DEVICES II

8467 0W **High electron mobility AlGaN/AlN/GaN HEMT structure with a nano-scale AlN interlayer** [8467-31]
S.-C. Huang, W.-R. Chen, National Formosa Univ. (Taiwan); Y.-T. Hsu, National Chiao Tung Univ. (Taiwan); J.-C. Lin, K.-J. Chang, W.-J. Lin, Chung Shan Institute of Science and Technology (Taiwan)

8467 0Y **3D silicon micro-pillars/-walls decorated with aluminum-ZnO/ZnO nanowires for opto-electronic device applications** [8467-33]
H. Karaagac, L. V. J., M. S. Islam, Univ. of California, Davis (United States)

8467 0Z **Contact metal effects in indium phosphide nanowire transistor** [8467-34]
J. Han, NASA Ames Research Ctr. (United States); A. J. Lohn, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States); M. Meyyappan, NASA Ames Research Ctr. (United States); N. P. Kobayashi, Univ. of California, Santa Cruz (United States) and Nanostructured Energy Conversion Technology and Research (United States)

Author Index

Conference Committee

Symposium Chairs

David L. Andrews, University of East Anglia Norwich (United Kingdom)
James G. Grote, Air Force Research Laboratory (United States)

Symposium Cochairs

Satoshi Kawata, Osaka University (Japan)
Manijeh Razeghi, Northwestern University (United States)

Conference Chairs

Nobuhiko P. Kobayashi, University of California, Santa Cruz (United States)
A. Alec Talin, National Institute of Standards and Technology (United States)
M. Saif Islam, University of California, Davis (United States)

Conference Program Committee

Kristine A. Bertness, National Institute of Standards and Technology (United States)
Albert Davydov, National Institute of Standards and Technology (United States)
Shadi A. Dayeh, Los Alamos National Laboratory (United States)
Supratik Guha, IBM Thomas J. Watson Research Center (United States)
Jung Han, Yale University (United States)
Chennupati Jagadish, The Australian National University (Australia)
Mutsumi Kimura, Ryukoku University (Japan)
Takhee Lee, Gwangju Institute of Science and Technology (Korea, Republic of)
Marina S. Leite, California Institute of Technology (United States)
Francois Leonard, Sandia National Laboratories, California (United States)
Samuel S. Mao, Lawrence Berkeley National Laboratory (United States)
Sanjay Mathur, Universität zu Köln (Germany)
Samuel Tom Picraux, Los Alamos National Laboratory (United States)
Sharka M. Prokes, U.S. Naval Research Laboratory (United States)
Zhifeng Ren, Boston College (United States)
Atsuhito Sawabe, Aoyama Gakuin University (Japan)
Fred Semendy, U.S. Army Research Laboratory (United States)

Loucas Tsakalakos, GE Global Research (United States)
Emanuel Tutuc, The University of Texas at Austin (United States)
Lionel Vayssieres, National Institute for Materials Science (Japan)
Deli Wang, University of California, San Diego (United States)
George T. Wang, Sandia National Laboratories (United States)

Session Chairs

1 Nanowires I
Nobuhiko P. Kobayashi, University of California, Santa Cruz (United States)

2 Low-Dimensional Materials I
Nobuhiko P. Kobayashi, University of California, Santa Cruz (United States)

3 Low-Dimensional Devices I
Silvija Gradecak, Massachusetts Institute of Technology (United States)

4 Atomic Layer Deposition
Albert Davydov, National Institute of Standards and Technology (United States)

5 Nanowires II
Joan M. Redwing, The Pennsylvania State University (United States)

6 Low-Dimensional Materials II
M. Saif Islam, University of California, Davis (United States)

7 Nano Characterization
Sharka M. Prokes, U.S. Naval Research Laboratory (United States)

8 Low-Dimensional Devices II
Nobuhiko P. Kobayashi, University of California, Santa Cruz (United States)
