Volume 10002

Proceedings of SPIE 0277-786X, V. 10002

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optics in Atmospheric Propagation and Adaptive Systems XIX, edited by Karin U. Stein, John D. Gonglewski
Proc. of SPIE Vol. 10002, 1000201 · © 2016 SPIE · CCC code: 0277-786X/16/\$18 · doi: 10.1117/12.2264480

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

SESSION 1 CHARACTERIZATION OF THE ENVIRONMENT

- 10002 02 **A world-wide comparison of aerosol data (Invited Paper) [10002-1]**
- 10002 03 **Comparison of MODTRAN simulations and transmission measurements by path-integrated and in-situ techniques over a rural site in northwestern Germany [10002-2]**
- 10002 04 **Instrumental intercomparison investigating vertical profiles of optical turbulence and wind speed in the lower atmospheric boundary layer during frontal passages in northwestern Germany [10002-3]**
- 10002 05 **Characterization of optical turbulence at the GREGOR solar telescope: temporal and local behavior and its influence on the solar observations [10002-4]**
- 10002 07 **Electro-optic testbed utilizing a dynamic range gated Rayleigh beacon for atmospheric turbulence profiling [10002-6]**

SESSION 2 THE FIRST EUROPEAN SOUTH AFRICAN TRANSMISSION EXPERIMENT (FESTER) I

- 10002 08 **FESTER: a propagation experiment, overview and first results [10002-7]**
- 10002 09 **First results on the experiment FESTER on optical turbulence over False Bay South Africa: dependencies and consequences [10002-8]**

SESSION 3 THE FIRST EUROPEAN SOUTH AFRICAN TRANSMISSION EXPERIMENT (FESTER) II

- 10002 0A **Path homogeneity along a horizontal line-of-sight path during the FESTER experiment: first results [10002-9]**
- 10002 0B **Vertical atmospheric variability measured above water during the FESTER experiment: first results [10002-10]**
- 10002 0C **Static and dynamic thermal infrared signatures measured during the FESTER experiment: first results [10002-11]**

SESSION 4 PROPAGATION THROUGH OPTICAL TURBULENCE

10002 0D **Neural network simulation of the atmospheric point spread function for the adjacency effect research** [10002-12]

10002 0E **Measurement of optical blurring in a turbulent cloud chamber** [10002-13]

SESSION 5 MITIGATION OF ATMOSPHERIC EFFECTS

10002 0I **Local motion compensation in image sequences degraded by atmospheric turbulence: a comparative analysis of optical flow vs. block matching methods (Invited Paper)**
[10002-18]

10002 0J **Performance of wavefront-sensorless adaptive optics using modal and zonal correction**
[10002-19]

10002 0K **Fourier holography in holographic wavefront sensors** [10002-20]

POSTER SESSION

10002 0L **Performance analysis of MRC spatial diversity receivers for satellite-to-ground downlink optical transmissions** [10002-21]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

Klaus Schäfer, (*Retired*) Karlsruhe Institute of Technology, Institute of Meteorology and Climate Research (Germany)

Symposium Co-chairs

Christopher M. U. Neale, University of Nebraska-Lincoln (United States), Daugherty Water for Food Institute (United States)
Iain H. Woodhouse, The University of Edinburgh (United Kingdom), Geography and the Lived Environment Research Institute (United Kingdom)

Conference Chairs

Karin U. Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
John D. Gonglewski, European Office of Aerospace Research and Development (United Kingdom)

Conference Programme Committee

Ivo Buske, Deutsches Zentrum für Luft- und Raumfahrt e.V. (Germany)
Sylvain Cheinet, Institut Franco-Allemand de Recherches de Saint-Louis (France)
David C. Dayton, Applied Technology Associates (United States)
Denis Dion Jr., Defence Research and Development Canada, Valcartier (Canada)
Vladimir P. Lukin, V.E. Zuev Institute of Atmospheric Optics (Russian Federation)
Cheryl Matson, University of California, San Diego (United States)
Sergio R. Restaino, U.S. Naval Research Laboratory (United States)
Alexander M. J. van Eijk, TNO Defence, Security and Safety (Netherlands)
Arthur D. van Rheenen, Norwegian Defence Research Establishment (Norway)
Mikhail A. Vorontsov, University of Dayton (United States)
Szymon Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Session Chairs

- 1 Characterization of the Environment
Karin U. Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 2 The First European South African Transmission Experiment (FESTER) I
Alexander M. J. van Eijk, TNO Defence, Security and Safety (Netherlands)
- 3 The First European South African Transmission Experiment (FESTER) II
Alexander M. J. van Eijk, TNO Defence, Security and Safety (Netherlands)
- 4 Propagation through Optical Turbulence
Szymon Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
- 5 Mitigation of Atmospheric Effects
Szymon Gladysz, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
