SPIE

Volume 10496

Proceedings of SPIE 1605-7422, V. 10496

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Elastography and Tissue Biomechanics V, edited by Kirill V. Larin, David D. Sampson, Proc. of SPIE Vol. 10496, 1049601 · © 2018 SPIE · CCC code: 1605-7422/18/\$18 · doi: 10.1117/12.2323044

Proc. of SPIE Vol. 10496 1049601-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Elastography and Tissue Biomechanics V*, edited by Kirill V. Larin, David D. Sampson, Proceedings of SPIE Vol. 10496 (SPIE, Bellingham, WA, 2018) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v	<i>Authors</i>
vii	<i>Conference Committee</i>

NOVEL METHODS

10496 06	High-resolution optical polarimetric elastography for measuring the mechanical properties of tissue [10496-5]
----------	--

OPTICAL COHERENCE ELASTOGRAPHY II

10496 0C	Optical coherence elastography assesses tissue modifications in laser reshaping of cornea and cartilages [10496-11]
10496 0G	Comparison between thermoelastic and ablative induced elastic waves in soft media using ultra-fast line-field low coherent holography [10496-15]
10496 0H	Structural characterization on in vitro porcine skin treated by ablative fractional laser using optical coherence tomography [10496-16]
10496 0I	High resolution SAW elastography for ex-vivo porcine skin specimen [10496-17]

COMPUTATION AND MODELING

10496 0P	Viscoelastic characterization of dispersive media by inversion of a general wave propagation model in optical coherence elastography [10496-24]
----------	--

ELASTOGRAPHY METHODS AND APPLICATIONS

10496 0Z	Cartilage microindentation using cylindrical and spherical optical fiber indenters with integrated Bragg gratings as force sensors [10496-34]
10496 11	Measuring in-vivo and in-situ ex-vivo the 3D deformation of the lamina cribrosa microstructure under elevated intraocular pressure [10496-36]

TISSUE MECHANICAL PROPERTIES

10496 17	Thermo-mechanical mechanism of laser-assisted alteration and stabilization of micro pore structure in eye-sclera [10496-42]
----------	--

POSTER SESSION

- 10496 1E **The potential of high intensity focused ultrasound (HIFU) combines phase-sensitive optical coherence tomography (PhS-OCT) for diseases diagnosis, treatment, and monitoring** [10496-50]
- 10496 1I **Brillouin light scattering spectroscopy for tissue engineering application** [10496-54]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

James G. Fujimoto, Massachusetts Institute of Technology
(United States)

R. Rox Anderson, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States) and Harvard Medical School
(United States)

Program Track Chair

Steven L. Jacques, Tufts University (United States)

Conference Chairs

Kirill V. Larin, University of Houston (United States)

David D. Sampson, The University of Western Australia (Australia)

Conference Program Committee

Jeffrey C. Bamber, Institute of Cancer Research (United Kingdom)

Albert Claude Boccara, Institut Langevin (France)

Stephen A. Boppart, University of Illinois at Urbana-Champaign
(United States)

Brett E. Bouma, Wellman Center for Photomedicine, Massachusetts
General Hospital (United States)

Zhongping Chen, Beckman Laser Institute and Medical Clinic
(United States)

Kishan Dholakia, University of St. Andrews (United Kingdom)

Christine P. Hendon, Columbia University (United States)

Daive Iannuzzi, Vrije University Amsterdam (Netherlands)

Brendan F. Kennedy, The University of Western Australia (Australia)

Sean J. Kirkpatrick, Michigan Technological University (United States)

Seemantini K. Nadkarni, Harvard University (United States)

Matthew O'Donnell, University of Washington (United States)

Amy L. Oldenburg, The University of North Carolina at Chapel Hill
(United States)

Gabriel Popescu, University of Illinois at Urbana-Champaign
(United States)

Jannick P. Rolland, University of Rochester (United States)

Giuliano Scarcelli, University of Maryland, College Park
(United States)

Gijs van Soest, Erasmus MC (Netherlands)

Peter Török, Imperial College London (United Kingdom)
Ruikang K. Wang, University of Washington (United States)
Vladislav V. Yakovlev, Texas A&M University (United States)
Seok Hyun A. Yun, Harvard University (United States)
Vladimir Y. Zaitsev, Russian Academy of Science Nizhny Novgorod
(Russian Federation)
Qifa Zhou, The University of Southern California (United States)

Session Chairs

- 1 Novel Methods
Stephen Allen Boppart, University of Illinois at Urbana-Champaign
(United States)
Kishan Dholakia, University of St. Andrews (United Kingdom)
Jannick P. Rolland, University of Rochester (United States)
- 2 Optical Coherence Elastography I
Sean J. Kirkpatrick, Michigan Technological University (United States)
- 3 Optical Coherence Elastography II
Giuliano Scarcelli, University of Maryland, College Park
(United States)
- 4 Cellular Biomechanics and Applications I
Albert Claude Boccara, Institut Langevin (France)
- 5 Computation and Modeling
Brendan F. Kennedy, The University of Western Australia (Australia)
Vladislav V. Yakovlev, Texas A&M University (United States)
- 6 Brillouin Elastography
Zhongping Chen, Beckman Laser Institute and Medical Clinic
(United States)
Matthew O'Donnell, University of Washington (United States)
- 7 Cellular Biomechanics and Applications: Joint Session with
Conferences 10496 and 10503
Kirill V. Larin, University of Houston (United States)
YongKeun Park, KAIST (Korea, Republic of)
Gabriel Popescu, University of Illinois at Urbana-Champaign
(United States)
David D. Sampson, The University of Western Australia (Australia)

- 8 Elastography Methods and Applications
Ruikang K. Wang, University of Washington (United States)
Shaozhen Song, University of Washington (United States)
- 9 Tissue Mechanical Properties
Amy L. Oldenburg, The University of North Carolina at Chapel Hill
(United States)
Qifa Zhou, The University of Southern California (United States)
