SPIE

Volume 11413

Proceedings of SPIE 0277-786X, V. 11413

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications II, edited by
Tien Pham, Latasha Solomon, Katie Rainey, Proc. of SPIE Vol. 11413, 1141301
© 2020 SPIE · CCC code: 0277-786X/20/$21 · doi: 10.1117/12.2572617

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications II*, edited by Tien Pham, Latasha Solomon, Katie Rainey, Proceedings of SPIE Vol. 11413 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

MULTI-DOMAIN OPERATIONS

11413 04 **The multi-domain operations effect loop: from future concepts to research challenges (Invited Paper)** [11413-1]

11413 05 **Growing an artificial intelligence capability: challenges and opportunities** [11413-2]

11413 06 **Minimizing data requirements for soldier-interactive AI/ML applications through opportunistic sensing** [11413-3]

11413 08 **Test and evaluation needs of multi-domain autonomous systems** [11413-5]

11413 09 **Network dynamics based multidomain sensor data processing and fusion for multidomain operations** [11413-6]

11413 0A **Policy-based ensembles for multi domain operations** [11413-7]

LEARNING AND REASONING WITH SMALL DATA SAMPLES, DIRTY DATA, HIGH CLUTTER, AND DECEPTION

11413 0B **Special datasets for training learning algorithms** [11413-18]

11413 0C **Achieving a trusted, reliable, AI-ready infrastructure for military medicine and civilian care** [11413-19]

11413 0D **Reasoning with small data samples for organised crime** [11413-21]

11413 0E **Repairing highly corrupted speech and images with U-net autoencoders** [11413-22]

11413 0F **Few-shot learning for defence and security** [11413-23]

AL-ENABLED SITUATION AWARENESS AND CONTEXT AWARE DECISION MAKING

11413 0G **Using AI/ML to predict perpetrators for terrorist incidents** [11413-24]

11413 0H **AI-enabled wargaming in the military decision making process** [11413-25]

11413 0I **A deep learning based methodology for video anomaly detection in crowded scenes** [11413-26]

11413 0J **Improving situational awareness with collective artificial intelligence over knowledge graphs** [11413-27]

NOVEL AI/ML FRAMEWORK AND ARCHITECTURES

11413 0K **Evaluation framework for input layer preprocessing in a radial basis function neural network** [11413-28]

11413 0L **An optimal end-to-end training strategy for multi-expert-based neural architecture** [11413-29]

11413 0N **Beyond traditional architecture for MDO applications: the Erlang VM and its potential** [11413-31]

11413 0O **A joint cross-modal super-resolution approach for vehicle detection in aerial imagery** [11413-32]

ADVERSARIAL MACHINE LEARNING AND SECURITY

11413 0P **Countermeasure against backdoor attacks using epistemic classifiers** [11413-33]

11413 0Q **Efficacy of defending deep neural networks against adversarial attacks with randomization** [11413-34]

11413 0R **Cyber resilience using autonomous agents and reinforcement learning** [11413-35]

11413 0S **Adversarial attacks and countermeasures against ML models in army multi-domain operations** [11413-37]

HUMAN AGENT TEAMING

11413 0T **Network analyses for bioinspired configurations of human and multiple entity teams** [11413-38]

11413 0U **Measuring complacency in humans interacting with autonomous agents in a multi-agent system** [11413-39]

11413 0V **Human swarm interaction using plays, audibles, and a virtual spokesperson** [11413-40]

11413 0W **Connecting soldiers with relay robots in challenging environments** [11413-41]

11413 0X **Human-robot teaming with human intent prediction and shared control** [11413-43]

NOVEL AI/ML MODELS, ALGORITHMS, AND APPLICATIONS

11413 0Y **Automatic construction of Markov decision process models for multi-agent reinforcement learning** [11413-44]

11413 0Z **Multifactorial evolutionary optimization for maximizing data aggregation tree lifetime in wireless sensor networks** [11413-45]

11413 10 **Bayesian classifier performance for realistically randomized signals** [11413-46]

11413 11 **Performance assessment of a machine-learning-derived digital RF communication classifier** [11413-47]

11413 12 **AI and ML in the multi-domain operations era: vision and pitfalls (Invited Paper)** [11413-48]

11413 13 **Augmenting wave-kinematics algorithms with machine learning to enable rapid littoral mapping and surf-zone state characterization from imagery** [11413-49]

11413 14 **Artificial intelligence for emergency management** [11413-50]

AUTONOMOUS MANEUVER IN COMPLEX ENVIRONMENTS

11413 15 **Aerial-ground vehicle path coordination algorithms for monitoring applications** [11413-51]

11413 16 **Toward fieldable human-scale mobile manipulation using RoMan** [11413-52]

11413 17 **Towards cognitive vehicles: location cognizance** [11413-53]

11413 18 **An integrated perception pipeline for robot mission execution in unstructured environments** [11413-54]

11413 19 **Routing of an unmanned vehicle for classification** [11413-55]

EXPLAINABLE AND AI-ENABLED ANALYTICS

11413 1B **Explanation systems for supporting IoBT-based C5ISR applications** [11413-57]

11413 1C **A framework for explainable deep neural models using external knowledge graphs** [11413-73]

JOINT SESSION WITH CONFERENCES 11413 AND 11425: AI/ML AND UNMANNED SYSTEMS

11413 1H **Obstacle avoidance and navigation utilizing reinforcement learning with reward shaping** [11413-12]

JOINT SESSION WITH CONFERENCES 11413 AND 11426: AI/ML AND XR

11413 1I **Cluster analysis of deep embeddings in real-time strategy games** [11413-16]

POSTER SESSION

11413 1J **Object detection on aerial imagery to improve situational awareness for ground vehicles** [11413-62]

11413 1K **Maneuverability hazard detection and localization in low-altitude UAS imagery** [11413-64]

11413 1L **Evaluating deep road segmentation techniques for low-altitude UAS imagery** [11413-65]

11413 1M **Lateral control of a convoy of vehicles with a limited preview information** [11413-66]

11413 1N **Multi-agent collaboration with ergodic spatial distributions** [11413-67]

11413 1O **Modeling the sequential behaviors of online users in recommender systems** [11413-68]

11413 1Q **Application of the TensorFlow object detection API to high speed videos of pyrotechnics for velocity calculations** [11413-70]

11413 1R **Multicore processors and GPUs: the power of parallel computing in the Cloud** [11413-71]

11413 1S **Negative ties network-based modeling of terrorist incidents** [11413-72]

11413 1T **A comparison of language representation models on small text corpora of scientific and technical documents** [11413-74]

11413 1U **Moving target defense for in-vehicle software-defined networking: IP shuffling in network slicing with multiagent deep reinforcement learning** [11413-76]

11413 1V **Modeling a multi-segment war game leveraging machine intelligence with EVE structures** [11413-78]

11413 1W **Self-updating models with error remediation** [11413-79]

11413 1Y **An FPGA implementation of a self-adaptive genetic algorithm** [11413-81]

11413 20 **Securing autonomous system in multi-domain tactical environment** [11413-83]

11413 21 **Comparison of skeleton models and classification accuracy for posture-based threat assessment using deep-learning** [11413-84]

11413 22 **Machine learning based automatic threat level assessment in fiber-optic Distributed Acoustic Sensing (DAS) intrusion detection system** [11413-87]
