PROCEEDINGS OF SPIE

ICOSM 2020: Optoelectronic Science and Materials

Pei Wang
Yuan Lu
Editors

25–27 September 2020
Hefei, China

Organized by
Key Laboratory of Infrared and Low Temperature Plasma in Anhui Province (China)

Sponsored by
National University of Defense Technology (China)
University of Science and Technology of China
AEIC Academic Exchange Information Centre (China)

Published by
SPIE

Volume 11606

Proceedings of SPIE 0277-786X, V. 11606

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

ICOSM 2020: Optoelectronic Science and Materials, edited by Pei Wang, Yuan Lu, Proc. of SPIE
Vol. 11606, 1160601 · © 2020 SPIE · CCC code: 0277-786X/20/$21 · doi: 10.1117/12.2590179

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *ICOSM 2020: Optoelectronic Science and Materials*, edited by Pei Wang, Yuan Lu, Proceedings of SPIE Vol. 11606 (SPIE, Bellingham, WA, 2020) Seven-digit Article CID Number.

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

OPTICAL INFORMATION PROCESSING TECHNOLOGY AND APPLICATION

11606 02 **A laser diode driving board with precise temperature control circuit for MDI-QKD experiment** [11606-15]

11606 03 **Adjusting the optical path of high-power holmium laser based on servo motor** [11606-16]

11606 04 **An algorithm of lens surface error compensation based on Zernike polynomial** [11606-41]

11606 05 **An investigation on large capacity optical access network** [11606-44]

11606 06 **Analysis of bur formation during laser-matter interaction** [11606-53]

11606 07 **Application and development trend of laser technology in military field** [11606-58]

11606 08 **Automobile exhaust simulation detection system based on photoacoustic spectroscopy** [11606-55]

11606 09 **Capacity failure prediction of lithium batteries for vehicles based on large data** [11606-52]

11606 0A **Comparative analysis of the collimation effect of three lenses in the illumination system of laser active imaging** [11606-57]

11606 0B **Comparison of four visual tracking algorithms based on deep learning** [11606-65]

11606 0C **Design of infrared double window selective radiator and its electromagnetic characteristics** [11606-45]

11606 0D **Efficient waveguide coupling of 1D photonic crystal surface plasmon coupling cavity** [11606-31]

11606 0E **Infrared and visible image fusion method based on NSST and guided filtering** [11606-23]

11606 0F **Laser fiber power supply and communication scheme for UHV GIL arc fault monitoring** [11606-46]

11606 0G **Optical design of portable Raman spectrometer based on-site rapid detection** [11606-30]

11606 0H **Pricing ancillary services together with energy in spot power market based on Vargas equilibrium theory** [11606-28]

11606 0I **Reducing hole trap densities in quasi-2D light-emitting perovskites** [11606-9]

11606 0J **Research and application of laser shock processing** [11606-22]

11606 0K **Research on electromagnetic properties of near-zero refractive index metamaterials** [11606-25]

11606 0L **Research on the fault detection method of low cost redundant inertial navigation group system based on GLT** [11606-47]

11606 0M **Research on the missile-borne image dehazing based on dark channel with gradient transmittance** [11606-67]

11606 0N **Signal compensation technology for optical transmitter module** [11606-12]

11606 0O **The research on underwater static target localization based on laser prototype** [11606-42]

11606 0P **Transmission line vibration monitoring technology based on Stokes parameters** [11606-10]

11606 0Q **Typical case analysis of distribution cable fire fault** [11606-59]

11606 0R **Typical case analysis of overload damage fault in distribution station area** [11606-64]

11606 0S **Vibration detecting for transmission line based on video monitoring** [11606-36]

OPTOELECTRONIC FUNCTIONAL MATERIALS AND DEVICES

11606 0T **A method for decomposing mid- and long-term trading power curve linked with spot trading** [11606-29]

11606 0U **A smartphone-based thermal imaging sensor for temperature measurement of animal groups** [11606-62]

11606 0V **A wide-band interference spectrometer based on bandpass sampling technology** [11606-20]

11606 0W **Analysis on the preparation methods of graphene and their characteristics** [11606-33]

11606 0X **Application of x-ray microCT in inclusion investigation for GH3536 part specimens manufactured by additive manufacturing** [11606-39]

11606 0Y **Comparative analysis of contact resistance of carbon nanotubes field-effect transistors** [11606-14]

11606 0Z **Design of wireless charging car based on supercapacitor** [11606-43]

11606 10 **Efficient near-infrared perovskite light-emitting diodes with controlled charge transport layer** [11606-66]

11606 11 **Experimental research on typical incense interference of photoelectric smoke detector** [11606-38]

11606 12 **Impact of emission layer of GaAs photocathode on certain wavelength absorptivity** [11606-17]

11606 13 **Nanoscale polymer domains' self-assembly in microstructure template based on AFM micromachining technique** [11606-56]

11606 14 **PCBM as interfacial layer in perovskite solar cell for efficient charge extraction** [11606-37]

11606 15 **Photoelectric properties of exfoliated few-layer Bi_2O_2Se nanoflakes** [11606-35]

11606 16 **Real-time monitoring system for CO and CO_2 of automobile exhaust based on FM-TDLAS** [11606-6]

11606 17 **Real-time monitoring system of NO_x and HC in vehicle exhaust based on DOAS** [11606-7]

11606 18 **Research on Mg_2Si films prepared using thermal evaporation with Al doping** [11606-18]

11606 19 **Simulation and analysis of anti-jamming performance of frequency hopping communication system** [11606-13]

11606 1A **Solvent engineering for $Cs_3Cu_2I_5$ based light-emitting diodes** [11606-8]

11606 1B **Surface temperature and infrared characteristics of oil storage tank** [11606-34]

11606 1C **The advance in transition-metal dichalcogenide ultrathin 2D-Ga_2O_3: characterization preparation application** [11606-32]

11606 1D **The comparative study of using Si and Te doping tunnel junction of GaAs vertical tandem monochromatic photovoltaic cell** [11606-4]

11606 1E **The nature and development of Zhundong coal** [11606-3]

11606 1F **The occurrence characteristics of Be element and analysis of Be ores resistivity: taking the Shaliuquan Be (Nb, Ta) deposits as an example** [11606-50]
