Volume 11905

Proceedings of SPIE 0277-786X, V. 11905

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum and Nonlinear Optics VIII, edited by Qiongyi He, Dai-Sik Kim,
Chuan-Feng Li, Proc. of SPIE Vol. 11905, 1190501 · © 2021 SPIE
CCC code: 0277-786X/21/\$21 · doi: 10.1117/12.2618931

Proc. of SPIE Vol. 11905 1190501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Quantum and Nonlinear Optics VIII*, edited by Qiongyi He, Dai-Sik Kim, Chuan-Feng Li, Proc. of SPIE 11905, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

QUANTUM OPTICS

- 11905 08 **Distribution and quantification of Wigner negativity remotely generated via Einstein-Podolsky-Rosen steering** [11905-6]

POSTER SESSION

- 11905 0Q **Fourier transform analysis on random quasi-phase matching problems** [11905-24]
- 11905 0R **High-peak-power, high-efficiency, widely tunable sub-nanosecond optical parametric generator based on PPMgLN** [11905-25]
- 11905 0S **Noise limits of polar-interferogram estimation at low light levels** [11905-26]
- 11905 10 **Widely tunable eye-safe optical parametric oscillation in an x-cut KTP crystal with noncollinear confocal pumping** [11905-34]
- 11905 11 **Phase compensation of continuous variable quantum key distribution based on mean denoising methods** [11905-35]
- 11905 12 **Nonlinear dynamics of sole ground-state emitting quantum dot laser subject to optical injection** [11905-36]
- 11905 13 **External digital power stabilization system for levitated optomechanics sensor** [11905-37]
- 11905 14 **Frequency-shifted-assisted continuous variable quantum key distribution with a local-local oscillator based on Gaussian modulated coherent state** [11905-38]
- 11905 15 **Experimental demonstration of high-rate Gaussian-modulated continuous-variable quantum key distribution with a local-local oscillator** [11905-39]
- 11905 16 **Practical intensity attack on continuous-variable quantum key distribution with a true local oscillator** [11905-41]
- 11905 17 **Nonlinear dynamics of a diode-pumped solid-state passively Q-switched Nd:YAG/Cr⁴⁺:YAG laser** [11905-42]
- 11905 1A **Femtosecond laser direct writing of photonic quantum logic gate chips for generating path-encoded entangled states** [11905-45]
- 11905 1B **Propagation of temporal mode multiplexed optical fields in fibers: influence of dispersion** [11905-46]

- 11905 1C **Polarization demultiplexing for CV-QKD system based on Stokes space** [11905-47]
- 11905 1D **1- and 2-photon-absorption properties of two organic molecules based on the Lorentz quantum impedance oscillator** [11905-48]
- 11905 1F **Freeform configurations to improve system resolution** [11905-50]
- 11905 1H **Passively mode-locked and Q-switched fiber laser utilizing a same tungsten oxide (WO₃) film as absorbers** [11905-52]
- 11905 1J **High-efficiency in-fiber nonlinear conversion of nanosecond optical pulses into structured packets of high-peak-power ultrashort pulses** [11905-55]
- 11905 1K **Noise-like pulses: useful or harmful?** [11905-56]
- 11905 1L **Numerical simulation of a picosecond fiber optical parametric oscillator based on a PCF** [11905-57]
- 11905 1M **Effects of spectral phase on ionization-induced self-compression of 100-GW pulse in hollow-core waveguide** [11905-58]
- 11905 1N **Analysis of the coherent properties of ultrashort pulses inside embedded cavities of mode-locked fiber laser and Raman oscillator** [11905-59]
