Volume 11974

Proceedings of SPIE, 1605-7422, V. 11974

Biomedical Applications of Light Scattering XII, edited by Adam Wax, Vadim Backman,
Proc. of SPIE Vol. 11974, 1197401 · © 2022 SPIE · 1605-7422 · doi: 10.1117/12.2634783

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Biomedical Applications of Light Scattering XII*, edited by Adam Wax, Vadim Backman, Proc. of SPIE 11974, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

SESSION 1 CLINICAL APPLICATIONS OF LIGHT SCATTERING

11974 02 **Theoretical definition and experimental validation of an correction factor to standardize the absolute magnitude of simulated and clinical spatially-resolved diffuse reflectance spectra [11974-4]**

SESSION 2 OCT AND LIGHT SCATTERING

11974 03 **Speckle statistics of cortical brain tissue in optical coherence tomography [11974-8]**

11974 04 **Measurement of optical scattering properties using line-field confocal optical coherence tomography (LC-OCT) [11974-10]**

SESSION 3 BIOPHYSICS OF CELLS

11974 05 **Imaging phase-function contrast with masked aperture scattering oblique plane microscopy [11974-12]**

11974 06 **A portable light scattering system for detecting expelled droplets to assess Covid-19 transmission risk [11974-15]**

SESSION 4 SPATIAL FREQUENCY DOMAIN IMAGING

11974 07 **Monitoring of surgical wound healing using spatial frequency domain imaging [11974-16]**

POSTER SESSION

11974 08 **Improved estimation of the optical properties in a skin five-layer model from spatially resolved diffuse reflectance spectra using a layer-by-layer approach and optimized combinations of wavelengths and source-detector distances [11974-21]**

11974 09 **Dynamic fluorescence diffuse optical tomography using the adaptive EKF and GRNN-based learning [11974-22]**

- 11974 0A **Breaking the rules of time-domain diffuse optics: working with 1 cm² SiPM and well-beyond the single-photon statistics** [11974-26]
- 11974 0B **Investigating the use of diffuse reflectance spectroscopy to identify shuntodynia** [11974-28]
- 11974 0C **Time-gated diffuse reflectance to discriminate optical properties of two-layered tissue phantoms** [11974-29]

Conference Committee

Symposium Chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische University Wien (Austria)

Program Track Chairs

Ammasi Periasamy University of Virginia (United States)
Daniel L. Farkas, University of Southern California (United States) and
SMI (United States)

Conference Chairs

Adam Wax, Duke University (United States)
Vadim Backman, Northwestern University (United States)

Conference Program Committee

Irving J. Bigio, Boston University (United States)
Nada N. Boustany, Rutgers, The State University of New Jersey
(United States)
Stephen A. Boppart, University of Illinois (United States)
Dirk J. Faber, Academisch Medisch Center (Netherlands)
Steven L. Jacques, Tufts University (United States)
Ofer Levi, University of Toronto (Canada)
Mary-Ann Mycek, University of Michigan (United States)
Lev T. Perelman, Harvard University (United States)
Brian W. Pogue, Thayer School of Engineering at Dartmouth
(United States)
Bruce J. Tromberg, National Institute of Biomedical Imaging and
Bioengineering (United States)
