SPIE

**Volume 12113**

Proceedings of SPIE 0277-786X, V. 12113

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications IV,  
edited by Tien Pham, Latasha Solomon, Proc. of SPIE Vol. 12113, 1211301  
© 2022 SPIE · 0277-786X · doi: 10.1117/12.2644341

Proc. of SPIE Vol. 12113 1211301-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *Artificial Intelligence and Machine Learning for Multi-Domain Operations Applications IV*, edited by Tien Pham, Latasha Solomon Proc. of SPIE 12113, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

ix *Conference Committee*

---

## **MULTI-DOMAIN OPERATIONS: CONCEPTS, FUTURE TRENDS, AND GAPS**

---

- 12113 04 **Lifelong learning for robust AI systems (Invited Paper)** [12113-1]
- 12113 05 **Distributed, multi-domain option generation across legacy planners** [12113-2]
- 12113 06 **Scaling distributed artificial intelligence/machine learning for decision dominance in all-domain operations** [12113-3]
- 12113 07 **Expediting the targeting process responsibly using artificial intelligence** [12113-4]

---

## **EXPLAINABLE AND AI-ENABLED ANALYTICS**

---

- 12113 08 **Instructive artificial intelligence (AI) for human training, assistance, and explainability** [12113-5]
- 12113 09 **Using influence functions to identify potential improvements for synthetic data generation** [12113-6]
- 12113 0A **Evaluating explainable artificial intelligence (XAI): algorithmic explanations for transparency and trustworthiness of ML algorithms and AI systems** [12113-7]

---

## **ADVERSARIAL MACHINE LEARNING AND SECURITY**

---

- 12113 0B **Autonomous system identification and exploitation through observation of behavior** [12113-15]
- 12113 0C **Establishing security and trust for object detection and classification with confidential AI** [12113-17]
- 12113 0D **Detecting trojans in satellite imagery AI applications** [12113-19]
- 12113 0E **An AI-based framework for remote sensing supporting multi-domain operations** [12113-16]

---

#### AUTONOMOUS MANEUVER IN COMPLEX ENVIRONMENTS

---

- 12113 OG **Distributing data throughout a MANET in a communications denied environment: reinforcement learning and game theory approaches** [12113-11]
- 12113 OH **The affinity of information within a multi-agent value of information paradigm** [12113-12]
- 12113 OI **Adaptive human-robot teaming through integrated symbolic and subsymbolic artificial intelligence: preliminary results** [12113-13]
- 12113 OJ **Decentralized multi-agent planning for maneuvering in complex scenarios** [12113-14]
- 12113 OK **Multi agent AI for tactical maneuvering** [12113-10]

---

#### FEDERATED/DISTRIBUTED AI/ML

---

- 12113 OL **Distributed hierarchical reinforcement learning in multi-agent adversarial environments** [12113-20]
- 12113 OM **Towards developing a data security aware federated training framework in multi-modal contested environments** [12113-22]
- 12113 ON **Network synthesis for tactical environments: scenario, challenges, and opportunities** [12113-23]

---

#### AI-ENABLED SITUATION AWARENESS AND CONTEXT AWARE DECISION MAKING

---

- 12113 OO **Multi domain dynamic targeting: recommending solutions using optimized coordinated algorithms that adapt to the mission** [12113-24]
- 12113 OP **CAPD: a context-aware, policy-driven framework for secure and resilient IoT operations** [12113-25]
- 12113 OR **PROGNOS: an automatic remaining useful life (RUL) prediction model for military systems using machine learning** [12113-71]
- 12113 OS **C2 design considerations for federated AI/ML systems** [12113-66]

---

#### ARTIFICIAL REASONING FOR COMMAND AND CONTROL

---

- 12113 OT **A methodology for flattening the command and control problem space** [12113-31]
- 12113 OV **Comprehensive top-K recommender system for command and control, using novel evaluation and optimization algorithms** [12113-32]

- 12113 OW **Learning to guide multiple heterogeneous actors from a single human demonstration via automatic curriculum learning in StarCraft II** [12113-34]
- 12113 OX **ARL Battlespace: a platform for developing novel AI for complex adversarial reasoning in MDO** [12113-28]
- 12113 OY **Metareasoning for multi-criteria decision making using complex information sources** [12113-29]
- 12113 OZ **Enhanced tactical inferencing (ETI): a decision recommendation framework** [12113-33]

---

#### NOVEL AI/ML MODELS, ALGORITHMS, AND APPLICATIONS I

---

- 12113 10 **Deducing 15 cm detail from 30 cm satellite images with deep learning** [12113-36]
- 12113 11 **Multi-agent reinforcement learning for training and non-linear optimization** [12113-39]
- 12113 12 **Predicting classifier performance using distributional separation measures** [12113-40]
- 12113 13 **Explore AI and machine learning for future ISR collection planning and management** [12113-41]
- 12113 14 **Emergent behaviors in multi-agent target acquisition** [12113-37]
- 12113 15 **Bi-level optimization for optimizing charging path and charging time in wireless rechargeable sensor networks** [12113-38]

---

#### NOVEL AI/ML MODELS, ALGORITHMS, AND APPLICATIONS II

---

- 12113 16 **System of system trade analysis of AI/ML processing for joint all-domain operations** [12113-43]
- 12113 17 **Quantized neural networks for modulation recognition** [12113-44]
- 12113 18 **Recent advances in multi-modal data fusion: status, challenges and perspectives** [12113-42]

---

#### MODELING AND SIMULATIONS

---

- 12113 1B **Maritime platform defense with deep reinforcement learning** [12113-51]
- 12113 1D **Deep reinforcement learning to assist command and control** [12113-52]

---

**AI/ML AND UNMANNED SYSTEMS: JOINT SESSION WITH CONFERENCES 12113 AND 12124**

---

- 12113 1E **Assuring autonomous operations in aviation: is use of AI a good idea?** [12113-99]
- 12113 1H **Enhancing inference time and memory utilization for machine learning in resource constrained internet of battlefield things** [12113-55]

---

**NOVEL AI/ML FRAMEWORK AND ARCHITECTURES**

---

- 12113 1J **Application of adversarial machine learning in protocol and modulation misclassification** [12113-57]
- 12113 1K **Combinatorial coverage framework for machine learning in multi-domain operations** [12113-58]
- 12113 1L **Federated learning for distributed spectrum sensing in NextG communication networks** [12113-59]
- 12113 1M **Energy efficient spiking neural network neuromorphic processing to enable decentralised service workflow composition in support of multi-domain operations** [12113-56]
- 12113 1N **Characterizing ML training performance at the tactical edge** [12113-60]

---

**POSTER SESSION**

---

- 12113 1O **An expansion on prioritized experience replay with round robin scheduling** [12113-61]
- 12113 1P **Advanced machine learning methods for autonomous classification of ground vehicles with acoustic data** [12113-62]
- 12113 1R **Study of fidelity of synthetic imagery for artificial intelligence (AI) and machine learning (ML) problems** [12113-64]
- 12113 1T **Archangel dataset: UAV-based imagery with position and pose metadata** [12113-68]
- 12113 1U **Minority class augmentation using GANs to improve the detection of anomalies in critical operations** [12113-69]
- 12113 1X **Visual attention for malware classification** [12113-74]
- 12113 1Z **Neural network training loss optimization utilizing the sliding innovation filter** [12113-76]
- 12113 20 **To fail or not to fail: an exploration of machine learning techniques for predictive maintenance** [12113-77]

- 12113 21 **Deep independent component network for thermal-to-visible face recognition** [12113-78]
- 12113 23 **Utility of doctrine with multi-agent RL for military engagements** [12113-81]
- 12113 24 **Exploring bias and fairness in artificial intelligence and machine learning algorithms** [12113-83]
- 12113 25 **Training data selection for event classification in a highly variable environment** [12113-84]
- 12113 26 **Enhanced tactical inferencing (ETI): an initial assessment** [12113-85]
- 12113 27 **The prediction management framework: ethical, governable, and interpretable deployment of artificial intelligence/machine learning systems** [12113-87]
- 12113 28 **Using ANN to study the gender effect on horizontal transmissibility to the head during whole-body vibration** [12113-100]
- 12113 29 **A machine learning approach for state-of-charge estimation of Li-ion batteries** [12113-102]

# Conference Committee

## *Symposium Chairs*

**Augustus W. Fountain III**, University of South Carolina (United States)  
**Teresa L. Pace**, L3Harris Technologies, Inc. (United States)

## *Program Track Chair*

**Tien Pham**, CCDC Army Research Laboratory (United States)

## *Conference Chairs*

**Tien Pham**, CCDC Army Research Laboratory (United States)  
**Latasha Solomon**, CCDC Army Research Laboratory (United States)

## *Conference CoChairs*

**Myron E. Hohil**, CCDC Armament Center (United States)  
**Ravi Ravichandran**, BAE Systems (United States)

## *Conference Program Committee*

**Tarek Abdelzaher**, University of Illinois (United States)  
**Jan Paolo Acosta**, U.S. Army Research Laboratory (United States)  
**Nathaniel Bastian**, U.S. Military Academy (United States)  
**Erik Blasch**, Air Force Office of Scientific Research (United States)  
**Gerome Bovet**, Armasuisse (Switzerland)  
**Kevin Chan**, CCDC Army Research Laboratory (United States)  
**Geeth del Mel**, IBM United Kingdom Ltd. (United Kingdom)  
**Nandi O. Leslie**, Raytheon Intelligence & Space (United States)  
**Henry Leung**, University of Calgary (Canada)  
**Gavin Pearson**, Defence Science and Technology Laboratory  
(United Kingdom)  
**Alun D. Preece**, Cardiff University (United Kingdom)  
**Katie Rainey**, Naval Information Warfare Center Pacific  
(United States)  
**Danda B. Rawat**, Howard University (United States)  
**Kelly K. D. Risko**, U.S. Army Aviation and Missile Command (France)  
**Peter Schwartz**, Mitre (United States)  
**Lee Seversky**, Air Force Research Laboratory (United States)  
**Neil J. Vallesterio**, CCDC Army Research Laboratory (United States)  
**Xiaogang Wang**, CCDC Army Research Laboratory (United States)  
**Michael Wolmetz**, Johns Hopkins University Applied Physics  
Laboratory, LLC (United States)
