

PROCEEDINGS OF SPIE

***Second International Conference
on Geographic Information and
Remote Sensing Technology
(GIRST 2023)***

**Fabio Tosti
Muhammad Bilal**
Editors

**21–23 July 2023
Qingdao, China**

Organized by
Yangtze University (China)

Sponsored by
University of West London (United Kingdom)
AEIC Academic Exchange Information Centre (China)

Published by
SPIE

Volume 12797

Proceedings of SPIE 0277-786X, V. 12797

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Second International Conference on Geographic Information and Remote Sensing Technology (GIRST 2023)
edited by Fabio Tosti, Muhammad Bilal, Proc. of SPIE Vol. 12797, 1279701
© 2023 SPIE · 0277-786X · doi: 10.1117/12.3008633

Proc. of SPIE Vol. 12797 1279701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Second International Conference on Geographic Information and Remote Sensing Technology (GIRST 2023)*, edited by Fabio Tosti, Muhammad Bilal, Proc. of SPIE 12797, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

GEOLOGICAL TECTONICS AND GEO-ENVIRONMENTAL MONITORING

- 12797 02 **Research on the calculation method of engineering earth volume under complex terrain conditions of Yellow River dam bank [12797-104]**
- 12797 03 **Analysis of the impact of land use change on surface temperature in Shandong Province from the perspective of urban-rural construction differences [12797-10]**
- 12797 04 **An analysis of lake remote sensing geography literature from 2003 to 2022: trends, fields, and influential factors [12797-91]**
- 12797 05 **Construction of an urban geological environment quality visualization system based on ArcEngine [12797-96]**
- 12797 06 **Daily temperature prediction with CMIP6 in the historical period of Hong Kong [12797-33]**
- 12797 07 **Response of SST and cold eddy kinetic energy to multiple tropical cyclones in the South China Sea [12797-89]**
- 12797 08 **Quantitative risk assessment of regional landslide geological disasters: a case study in Damusi Township [12797-67]**
- 12797 09 **Long-term analysis of PM2.5 spatiotemporal patterns from industrial heat sources in the Beijing-Tianjin-Hebei region [12797-114]**
- 12797 0A **Analysis of spatial and temporal changes of industrial heat sources in Ukraine from 2012 to 2022 [12797-55]**
- 12797 0B **Research on disaster evaluation of surface deformation in highway corridors based on MT-InSAR technology [12797-108]**
- 12797 0C **Study on geographical characteristics and influencing factors of scarlet fever based on Bayesian hierarchical spatio-temporal model and geodetector [12797-32]**
- 12797 0D **County road identification and preliminary risk assessment of natural disasters: take Changqing District as an example [12797-31]**
- 12797 0E **Research on spacecraft orbit warning and monitoring based on digital Earth [12797-54]**
- 12797 0F **The application of SBAS-INSAR technology in the identification and monitoring of geological hidden points of transmission line channels in southwest mountainous areas [12797-18]**

- 12797 OG **Rapid identification and analysis of vegetation information based on onboard LIDAR point cloud data** [12797-93]
- 12797 OH **Spatial distribution characteristics and impact analysis of national wetland parks in the Yellow River basin from the perspective of arcgis** [12797-71]
- 12797 OI **3D geological modeling and structural analysis of Nantong City based on borehole data** [12797-51]
- 12797 OJ **Time-series InSAR-based landslide identification and monitoring in the hilly areas of the northern Qinling Mountains** [12797-83]
- 12797 OK **Inversion of sea surface temperature in South China Sea based on machine learning method** [12797-52]
- 12797 OL **Driving mechanisms of rice multi-cropping change in Southern China based on geodetector** [12797-79]
- 12797 OM **Research on the application of InSAR technology in the field verification of cross-border mining in HePan coal mines** [12797-50]
- 12797 ON **Preliminary application evaluation of GF1-BCD satellite data in remote sensing survey of regional eco-geological environment** [12797-61]
- 12797 OO **Identification of Qinghai Menyuan Ms6.9 earthquake-stricken area based on VNP46A2 night lighting image** [12797-3]
- 12797 OP **The underground object detection method with a self-attention mechanism** [12797-75]
- 12797 OQ **Determination of the range of Duobao Sand Hill in Poyang Lake** [12797-20]
- 12797 OR **Deep learning based Landsat 8 OLI multi-band aerosol optical thickness inversion** [12797-90]
- 12797 OS **Study on mangrove extraction in Beibu Gulf of Guangxi considering phenological characteristics** [12797-53]
- 12797 OT **Analysis of landslide susceptibility in Qingyuan City based on machine learning and SINMAP coupling model** [12797-9]
- 12797 OU **Study of surface motion characteristics of Petermann Glacier based on the Sentinel-1 offset tracking method** [12797-62]
- 12797 OV **The application prospect of geographic information technology in the new round of strategic action for prospecting breakthroughs** [12797-102]
- 12797 OW **High-temperature disaster risk measurement and resilience assessment in Chongqing: take the main city of Chongqing as an example** [12797-25]
- 12797 OX **The spatial distribution and influencing factors of peer-to-peer accommodations in Beijing based on geodetector** [12797-98]

- 12797 0Y **Suitability analysis on site in mountainous areas: a case study of Panzhuhua region** [12797-30]
- 12797 0Z **Discrimination techniques of heavy foggy days in Leizhou Peninsula and the application effect analysis** [12797-99]

HYDROLOGICAL MAPPING AND SPATIO-TEMPORAL INFORMATION RECOGNITION

- 12797 10 **Research on the extraction of winter wheat planting area in Henan Province based on time-series EVI** [12797-94]
- 12797 11 **Characteristics of climate changes and the impact on the changes of landscape pattern in Nansi Lake** [12797-106]
- 12797 12 **Identification and simulation of traffic crime risk posture within the central city of Wuhan in China** [12797-111]
- 12797 13 **Study on Shenyang urban employment spatial characteristics based on cell phone signaling data** [12797-60]
- 12797 14 **Research on fine-grained classification algorithm for remote sensing image of forest and grassland** [12797-63]
- 12797 15 **Production technology research of naked-eye 3D map** [12797-56]
- 12797 16 **Application of airborne laser radar technology of UAV based on river embankment survey** [12797-65]
- 12797 17 **Enhanced detection of cement plants in remote sensing images using modified faster R-CNN** [12797-112]
- 12797 18 **Inversion of sea surface salinity in Bay of Bengal based on Catboost algorithm** [12797-39]
- 12797 19 **A software system for evaluating the quality of aerial photographic unreferenced images** [12797-107]
- 12797 1A **Rapid retrieval system of UAV image based on deep learning** [12797-48]
- 12797 1B **Research on simplification of 3D fine model based on UE5** [12797-23]
- 12797 1C **Study on spatial heterogeneity and influencing factors of road network development in Greater Bay Area of Guangdong, Hong Kong and Macao** [12797-27]
- 12797 1D **Moisture content measurement technology of wet natural gas** [12797-14]
- 12797 1E **Research on the pre-setting initial readings of electronic theodolites** [12797-26]
- 12797 1F **A remote sensing image segmentation model based on multi-scale feature fusion** [12797-47]

- 12797 1G **Recognition of building grid distribution pattern based on graph convolution neural network model** [12797-42]
- 12797 1H **Impervious surface extraction and spatiotemporal analysis in the main urban area of Zhengzhou** [12797-58]
- 12797 1I **Urban coastal area subsidence monitoring and analysis using SBAS-InSAR method: a case study of the Qingdao west coast new area** [12797-19]
- 12797 1J **Identification, evaluation, and construction of potential leftover spaces based on parametric design platform: a study of Daxiaoma block in Guangzhou** [12797-4]
- 12797 1K **Research on rapid loading and measuring method of panorama based on depth image** [12797-88]
- 12797 1L **Comprehensive influence of water resources development and utilization on ecological environment in Taohe River basin** [12797-44]
- 12797 1M **A filtering method for TDOA measurement based on cluster center point** [12797-82]
- 12797 1N **An ontology-based approach to modeling ocean eddies in spatio-temporal objects** [12797-86]
- 12797 1O **Roadway automation modeling** [12797-24]
- 12797 1P **Fine extraction of arctic sea ice based on CA-DeepLabV3+ model** [12797-45]
- 12797 1Q **A new distance scanning off-axis stripmap imaging mode** [12797-13]
- 12797 1R **Automatic measurement of transmission tower height based on PointNet++ and support vector regression** [12797-78]
- 12797 1S **Land use type identification on the basis of drone imagery and object-oriented methods** [12797-101]
- 12797 1T **Real-time monitoring and feedback design for autonomous slope repair based on binocular vision** [12797-6]
- 12797 1U **A superpixel-level CFAR method for nearshore ship detection in polarimetric SAR images based on GP-PNF** [12797-57]
- 12797 1V **Detection and recognition of aircraft target in SAR image** [12797-5]
- 12797 1W **Research on the temporal and spatial characteristics of cities in western China to undertake manufacturing transfer** [12797-46]
- 12797 1X **A geometric registration method for the 3D building models generated from oblique photogrammetry and building information modeling** [12797-85]
- 12797 1Y **Research on key technologies of information-based production for basic surveying and mapping products** [12797-105]

SATELLITE NAVIGATION AND REMOTE SENSING DATA ANALYSIS

- 12797 1Z **An algorithm of extracting skylines based on point cloud data** [12797-21]
- 12797 20 **Spatial-temporal correlation analysis of straw burning and AOD in Shandong Province based on remote sensing data** [12797-59]
- 12797 21 **Research on vector data overlay analysis algorithm based on spatial segmentation** [12797-22]
- 12797 22 **Real-time monitoring and analysis of industrial heat sources based on data: Hangzhou City as an example** [12797-81]
- 12797 23 **Research progress in unmanned aerial vehicle-borne hyperspectral imaging payload** [12797-15]
- 12797 24 **Inversion of tropospheric temperature and humidity profile based on atmospheric empirical database** [12797-11]
- 12797 25 **Dynamic monitoring and spatiotemporal change analysis of Chaohu Lake algal bloom based on Sentinel-2 remote sensing data** [12797-36]
- 12797 26 **Evaluation of the applicability of multiple remote sensing drought indices for monitoring of dry and wet in southwest China** [12797-92]
- 12797 27 **Data quality detection and analysis of GNSS reference stations in Guangxi Province** [12797-113]
- 12797 28 **Double-differential ionospheric delay simulation analysis based onboard single-frequency GPS of space-aircraft** [12797-41]
- 12797 29 **Research on inversion method of atmospheric temperature and humidity profile based on microwave radiometer** [12797-37]
- 12797 2A **A precise positioning method for global navigation satellite system based on BDS/GPS fusion** [12797-40]
- 12797 2B **A multidimensional gross error positioning method for GNSS navigation satellite based on UKF algorithm** [12797-100]
- 12797 2C **A cloud-based solution and platform for remote sensing big data applications: challenges and opportunities** [12797-80]
- 12797 2D **Comparison of 4 vector polygon clipping algorithms in the spatial overlay analysis of GIS using simple feature model** [12797-8]
- 12797 2E **Identification of mining environmental problems in high and cold plateau regions based on multisource remote sensing** [12797-17]
- 12797 2F **Impact analysis of LAI parameters on yield evaluation of RS-P-YEC model** [12797-84]

- 12797 2G **A detection sensitivity method for star sensor based on star point matching** [12797-34]
- 12797 2H **Spatio-temporal evolution of multi-scale carbon emissions based on multi-source nighttime light remote sensing data in Fujian Province** [12797-97]
- 12797 2I **Research on optimized deployment methods for indoor UWB base stations based on three-dimensional spatial analysis** [12797-87]
- 12797 2J **Morphological characteristics of scrub in arid and semi-arid regions based on multi-source LiDAR research and voxel modeling** [12797-69]
- 12797 2K **Research on adjustment function model transformation of searching closed loop** [12797-28]
- 12797 2L **A method for determining rice planting areas considering the phenological characteristics of multi-phase high-resolution remote sensing images** [12797-109]
- 12797 2M **Inversion and evaluation of water quality parameters of Yuehai Lake in Yinchuan based on satellite remote sensing** [12797-73]
- 12797 2N **Spatial adaptability analysis of tobacco product supply and demand based on poi data: takes Guanshanhu District as an example** [12797-103]
- 12797 2O **Remote sensing monitoring and comparison of classification algorithms for wetland vegetation phenology: a case study of the Yellow River delta** [12797-43]
- 12797 2P **A study into the integration of AR-based data collection and multi-dimensional signal processing methods for GB-SAR target detection** [12797-49]
- 12797 2Q **Remote sensing monitoring of scenic spots in Zhejiang Province based on high-resolution imagery** [12797-16]
- 12797 2R **Monitoring wetland evolution in the Yellow River delta from 1990 to 2020 based on long time series landsat data** [12797-2]
- 12797 2S **The method for extracting the spatial distribution of winter wheat based on dual polarization synthetic aperture radar data** [12797-35]
- 12797 2T **Reconstruct satellite-derived chlorophyll concentration and reflectance data of Bohai Bay by using an improved DINEOF method** [12797-64]
- 12797 2U **Extraction of bamboo forests based on GEE and remote sensing different feature datasets: a case study of Wuxing District, China** [12797-76]
- 12797 2V **Research on imaging algorithm of the arc array bistatic SAR data with a satellite transmitter** [12797-12]
- 12797 2W **Spatial and temporal variation analysis of water quality in Xiangjiang River basin based on water quality monitoring data** [12797-68]
- 12797 2X **Identification of sea fog in Qingdao caused by Jianghuai cyclones based on remote sensing and observation data** [12797-7]

- 12797 2Y **Real-time data fusion method of multiple photoelectric theodolites based on fault-tolerant mechanism** [12797-116]
- 12797 2Z **UAV localisation and formation analysis based on passive dual-station localisation and after optimised models** [12797-115]

Conference Committee

Conference Chair

Fabio Tosti, University of West London (United Kingdom)

Organizing Committee Chair

Xingong Tang, Yangtze University (China)

Organizing Committee Members

Wei Zhu, Yangtze University (China)

Lei Zhou, Yangtze University (China)

Dong Zhao, Yangtze University (China)

Yukun Liu, Yangtze University (China)

Yanfeng Ming, Shandong University of Science and Technology (China)

Xiehui Li, Chengdu University of Information Technology (China)

Fei Huo, University of Saskatchewan (Canada)

Zhongyu Li, Chengdu Normal University (China)

Xiaotian Shi, Wuhan National Laboratory for Optoelectronics (China)

Technical Program Committee Chairs

Mohamed Elhag, King Abdulaziz University (Saudi Arabia)

Anastasia Sofroniou, University of West London (United Kingdom)

Technical Program Committee Members

Akhouri Pramod Krishna, Birla Institute of Technology (India)

Jingguo Lv, Beijing University of Civil Engineering and Architecture (China)

Xiaoguang Wang, Chengdu University of Technology (China)

Khadidja Bakhti, Algerian Space Agency (Algeria)

Muhammad Bilal, Henan Polytechnic University (China)

Huan Yu, Chengdu University of Technology (China)

Vijay Vohora, Mapping Earth Resources Ltd (United Kingdom)

Mirza Muhammad Waqar, CONTEC (South Korea)
