PROCEEDINGS OF SPIE

Sixth International Conference on Wireless Communications and Smart Grid (ICWCSG 2024)

Jinsong Wu
Pascal Lorenz
Editors

26–28 July 2024
Dali, China

Organized by
Guilin University of Electronic Technology (China)

Sponsored by
AEIC—Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13277

Proceedings of SPIE 0277-786X, V. 13277

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Sixth International Conference on Wireless Communications and Smart Grid (ICWCSG 2024),
edited by Jinsong Wu, Pascal Lorenz, Proc. of SPIE Vol. 13277, 1327701
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3051127

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Sixth International Conference on Wireless Communications and Smart Grid (ICWCSG 2024)*, edited by Jinsong Wu, Pascal Lorenz, Proc. of SPIE 13277, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

WIRELESS COMMUNICATION AND INFORMATION SYSTEM TECHNOLOGY

13277 02 **Design of space-based intelligent information system based on LEO constellation** [13277-30]

13277 03 **Spatio-temporal feature-based encrypted traffic classification model ASTNet** [13277-21]

13277 04 **Key nodes identification in communication networks based on multiview network reliability** [13277-11]

13277 05 **Quantum security analysis of SM4 algorithm** [13277-45]

13277 06 **Multi-strategy particle swarm optimization algorithm based on optical** [13277-6]

13277 07 **Performance analysis of cooperative NOMA-assisted downlink SWIPT communication system** [13277-64]

13277 08 **Adaptation study of novel services and communication technologies for distributed smart grid communication networks** [13277-63]

13277 09 **RFID technology with anti-collision algorithm based on hybrid neural network** [13277-51]

13277 0A **Joint beamforming design for reconfigurable intelligent surface-assisted high-speed railway communication systems with per-antenna power constraints** [13277-23]

13277 0B **Prediction of short-wave maximum usable frequency by long short-term memory neural networks based on deep learning techniques** [13277-56]

13277 0C **Research on system-of-systems simulation of space-earth integrated communication based on factor analysis** [13277-36]

13277 0D **Research on 2D beam scanning liquid crystal reflective array based on subarray division at K-band** [13277-47]

13277 0E **Study on the influence of different numbers of array elements on direction finding performance** [13277-9]

13277 0F **An accelerated exploitation differential evolution algorithm for parameter estimation of photovoltaic models** [13277-22]

13277 0G **Research on non-intrusive load identification technology** [13277-16]

13277 0H **Research on indoor mobile robot navigation technology based on ROS** [13277-10]

13277 0I **Virtual simulation verification of AFDX network-side system-on-chip** [13277-52]

13277 0J **Research on intelligent detection of cables of raw rice bridge based on rope climbing robot** [13277-4]

13277 0K **Application of SAVNET in typical ISP network scenarios** [13277-7]

13277 0L **Design and verification of an emergency communication system** [13277-20]

13277 0M **Analysis and simulation of diversity receiving bit error performance in tropospheric scatter communication** [13277-14]

SMART GRID AND POWER SYSTEM MODELING

13277 0N **Unsupervised anomaly detection algorithm for sensor data streams based on GAT-GAN** [13277-32]

13277 0O **A short-term load forecasting method for main network considering multi-scenario operation** [13277-40]

13277 0P **Transaction optimisation for multi-microgrid system based on non-cooperative games** [13277-62]

13277 0Q **Optimization research on relay protection of distribution network with distributed photovoltaics** [13277-50]

13277 0R **Multilayer security detection of wireless sensor networks based on NAWL-ILSTM** [13277-37]

13277 0S **A technical solution for the power space-based IoT system of power transmission, transformation, and distribution services** [13277-25]

13277 0T **A method for generating switching operation sequences based on generative adversarial networks** [13277-53]

13277 0U **Edge computing model for coupled monitoring of conductor sag and safety distance risk** [13277-3]

13277 0V **Design of structural routing optimization of Bluetooth mesh networks for multiscenario applications in distributed smart grid** [13277-59]

13277 0W **Adaptive federated learning device selection strategy based on edge-end performance prediction** [13277-26]

13277 0X **3D optimization model of overhead transmission wire based on UAV aerial survey modeling** [13277-35]

13277 0Y **Optimization of ray tracking algorithm for radio transmission loss under urban terrain** [13277-60]

13277 0Z **Path planning localization method for mobile anchor nodes in WSNs** [13277-48]

13277 10 **Comparative analysis of transformer variants for time series prediction on multiple network functions data** [13277-19]

13277 11 **Integrated energy microgrid source-load coordinated scheduling based on hybrid two-stage robust optimization** [13277-18]

13277 12 **A bi-level distributed optimization approach for weakly interconnected networked microgrids** [13277-2]

13277 13 **Design of a high linearity power amplifier with temperature compensation bias circuit** [13277-29]

13277 14 **Multiload forecasting method for microgrid based on STSGCN** [13277-41]

13277 15 **Research on load forecasting methods considering multi-industry user datasets** [13277-5]

13277 16 **Research on intelligent transformation of power grid based on artificial intelligence algorithm** [13277-8]

13277 17 **The application of deep learning algorithms in power system load forecasting** [13277-42]

13277 18 **Electric load forecasting method based on DQPSO-LSTM with joint tax and electricity data** [13277-61]

13277 19 **Design of self-checking power division network with high reliability** [13277-31]

Conference Committee

General Conference Chair

Pingyi Fan, Tsinghua University (China)

Publication Chair

Pascal Lorenz, University of Haute Alsace (France)

International Technical Program Chairs

Jinsong Wu, University of Chile (Chile)
Parikshit N. Mahalle, Vishwakarma Institute of Information Technology (Pune)

Organizing Committee

Michal Feckan, Comenius University in Bratislava (Slovakia)
Shuanghua Yang, Southern University of Science and Technology (China)
Tao Wang, Sun Yat-Sen University (China)
Mohd Shakir Bin Md Saat, Albukhary International University (Malaysia)
Guohua Qu, Dalian University of Technology (China)
Ke-Jun Li, Shandong University (China)
Hui Chen, Guilin University of Electronic Technology (China)
Yujie Li, Guilin University of Electronic Technology (China)
Shahzad Ashraf, NFC Institute of Engineering and Technology Multan (Pakistan)
Nasir Saeed, United Arab Emirates University (United Arab Emirates)

International Technical Program Committee

Cheng Chin, Newcastle University (Singapore)
Santhosh Krishna B. V., New Horizon College of Engineering (India)
Marina Yusoff, Universiti Teknologi MARA (Malaysia)
Zhiliang Qin, Nanyang Technological University (Singapore)
Surej Rajan C., Toc H Institute of Science and Technology (India)
Pavel Loskot, Zhejiang University-University of Illinois at Urbana-Champaign Institute (China)
Babu George, Fort Hays State University (United States)
