**Volume 13497**

Proceedings of SPIE 0277-786X, V. 13497

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2024: Optical Design and Manufacturing, edited by Xichun Luo, Proc. of SPIE  
Vol. 13497, 1349701 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3058291

Proc. of SPIE Vol. 13497 1349701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:  
Author(s), "Title of Paper," in *AOPC 2024: Optical Design and Manufacturing*, edited by Xichun Luo, Proc. of SPIE 13497, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

## OPTICAL DESIGN AND MANUFACTURING

---

- 13497 02 **Study on the algorithm for improving the FFT calculation accuracy of the Richards-Wolf focusing field in the xz plane** [13497-5]
- 13497 03 **Application of Zernike polynomial optimized lens design in orientation detection** [13497-6]
- 13497 04 **Cascaded FPI-FBG hybrid fiber sensor based on gold nanofilm mirror for simultaneous measurement of refractive index and temperature** [13497-7]
- 13497 05 **A design of ultra-high definition dual-lens optical system with long back focal length** [13497-9]
- 13497 06 **Parametric modeling and optimization of lightweight large aperture mirror driven by support** [13497-10]
- 13497 07 **Optical lens design based on spheroidal imaging** [13497-13]
- 13497 08 **Design of stray light suppression for large field off-axis three-reflection space camera** [13497-14]
- 13497 09 **Construction and application of fiber optic gyro digital prototype based on digital twin technology** [13497-15]
- 13497 0A **High-precision measurement technology for microdisplacement of optical components in vibration environment** [13497-17]
- 13497 0B **Automated imaging performance balance of complicated imaging optical systems based on out-loop and performance change ratio** [13497-18]
- 13497 0C **Theoretical and experimental study on the effect of N-doping concentration on TiO<sub>2</sub> thin film photocatalytic performance** [13497-21]
- 13497 0D **High-precision and traceable equipment for measuring aspheric mirror surface** [13497-23]
- 13497 0E **Power-exponent-phase vortex beam arrays for generation enabled by Dammann gratings** [13497-24]

- 13497 OF **Design of a large field of view light engine for augmented reality displays** [13497-26]
- 13497 OG **Study on the effect of different spectral splitting strategies on the efficiency of micro-concentrator systems** [13497-27]
- 13497 OH **Analysis and optimization of field curvature and pupil swim for near-eye display systems** [13497-29]
- 13497 OI **Review of the baffle technology application** [13497-30]

# Conference Committee

## *Conference Chairs*

**Lingbao Kong**, Fudan University (China)

**Dawei Zhang**, University of Shanghai for Science and Technology  
(China)

**Xichun Luo**, University of Strathclyde (United Kingdom)

## *Program Committee*

**Longxiang Li**, Changchun Institute of Optics, Fine Mechanics and  
Physics, Chinese Academy of Sciences (China)

**Haitao Liu**, Perfect Optics Co., Ltd. (China)

**Huasong Liu**, Tianjin Jinhang Institute of Technical (China)

**Shixiang Wang**, Fudan University (China)

**Peng Xu**, Harbin Institute of Technology (China)

**Gao Yang**, Shenzhen University (China)

**Chunyu Zhang**, Laser Fusion Research Center (China) and the  
Academy of Engineering Physics (China)

**Chenyang Zhao**, Harbin Institute of Technology (China)
