Volume 11167

Proceedings of SPIE 0277-786X, V. 11167

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Quantum Technologies and Quantum Information Science V, edited by Mark T. Gruneisen, Miloslav Dusek, Paul M. Alsing, John G. Rarity, Proc. of SPIE Vol. 11167, 1116701
© 2019 SPIE · CCC code: 0277-786X/19/$21 · doi: 10.1117/12.2554467

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Authors*
vii *Conference Committee*

QUANTUM NETWORKS, CHANNELS, AND PROTOCOLS I

11167 02 **Towards hyperentangled time-bin and polarization superdense teleportation in space (Invited Paper)** [11167-1]

QUANTUM ALGORITHMS AND COMPUTATION

11167 0B **Quantum implementation of the Shor-code on multiple simulator platforms** [11167-11]

QUANTUM NETWORKS, CHANNELS, AND PROTOCOLS III

11167 0G **The Hilbert-Schmidt inner product: quantum illumination and beyond** [11167-17]

11167 0H **Stratospheric QKD: feasibility analysis and free-space optics system concept** [11167-23]

QUANTUM SENSORS, CLOCKS, AND ENABLING TECHNOLOGIES

11167 0L **GaN laser diodes for quantum sensors and optical atomic clocks** [11167-21]

POSTER SESSION

11167 0N **Object tracking and identification by quantum radar** [11167-24]

Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Ric Schleijpen, TNO Defence, Security and Safety (Netherlands)
Karin U. Stein, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

Symposium Co-chair

Catherine Barrat, HGH Systèmes Infrarouges (France)

Conference Chairs

Mark T. Gruneisen, Air Force Research Laboratory (United States)
Miloslav Dusek, Palacký University Olomouc (Czech Republic)
Paul M. Alsing, Air Force Research Laboratory (United States)
John G. Rarity, University of Bristol (United Kingdom)

Conference Programme Committee

Konrad Banaszek, University of Warsaw (Poland)
Jan Bouda, Masaryk University (Czech Republic)
Robert W. Boyd, University of Ottawa (Canada)
Michael Brodsky, U.S. Army Research Laboratory (United States)
Gerald S. Buller, Heriot-Watt University (United Kingdom)
Ryan M. Camacho, Brigham Young University (United States)
Marcos Curty, Universidade de Vigo (Spain)
Michael L. Fanto, Air Force Research Laboratory (United States)
John D. Gonglewski, Air Force Research Laboratory (United States)
Gregory S. Kanter, NuCrypt LLC (United States)
Prem Kumar, Northwestern University (United States)
Norbert Lütkenhaus, University of Waterloo (Canada)
Vadim V. Makarov, University of Waterloo (Canada)
Ronald E. Meyers, U.S. Army Research Laboratory (United States)
Momtchil Peev, Huawei Technologies Company, Ltd. (Germany)
Renato Renner, ETH Zürich (Switzerland)
Andrew J. Shields, Toshiba Research Europe Ltd. (United Kingdom)
Kathy-Anne Soderberg, Air Force Research Laboratory (United States)
Rupert Ursin, Austrian Academy of Sciences (Austria)

Session Chairs

1 Quantum Networks, Channels, and Protocols I
Mark T. Gruneisen, Air Force Research Laboratory (United States)

2 Quantum Networks, Channels, and Protocols II
Michael L. Fanto, Air Force Research Laboratory (United States)

3 Quantum Algorithms and Computation
Paul M. Alsing, Air Force Research Laboratory (United States)

4 Quantum Protocol and Devices
Paul M. Alsing, Air Force Research Laboratory (United States)

5 Quantum Networks, Channels, and Protocols III
Christopher C. Tison, Florida Atlantic University (United States)

6 Quantum Sensors, Clocks, and Enabling Technologies
Shannon Ray
