PROCEEDINGS OF SPIE

Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications

Christopher L. Howell Kimberly E. Manser Raghuveer M. Rao

1–3 May 2023 Orlando, Florida, United States

Sponsored and Published by SPIE

Volume 12529

Proceedings of SPIE 0277-786X, V. 12529

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications, edited by Christopher L. Howell, Kimberly E. Manser, Raghuveer M. Rao, Proc. of SPIE Vol. 12529, 1252901 © 2023 SPIE · 0277-786X · doi: 10.1117/12.2690655

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings: Author(s), "Title of Paper," in Synthetic Data for Artificial Intelligence and Machine Learning: Tools, Techniques, and Applications, edited by Christopher L. Howell, Kimberly E. Manser, Raghuveer M. Rao, Proc. of SPIE 12529, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of fees. To obtain permission to use and share articles in this volume, visit Copyright Clearance Center at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher.

Printed in the United States of America by Curran Associates, Inc., under license from SPIE.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

DATA ENGINEERING AND CURATION

	DATA ENGINEERING AND CURATION
12529 03	Generating synthetic IR imagery to train modern deep learning detection and recognition algorithms to perform on similar real IR data [12529-2]
12529 04	Real-data performance evaluation of Unreal Engine synthetic IR data [12529-3]
12529 05	Ignorance is bliss: flawed assumptions in simulated ground truth [12529-4]
12529 06	Automated image quality alert utility for monitoring video acquisition [12529-5]
12529 07	Real-data performance evaluation of composite synthetic IR data [12529-6]
	FIDELITY AND SENSITIVITY ANALYSIS
12529 08	Fidelity requirements for simulating sensor performance in autonomous ground vehicles [12529-7]
12529 OA	Sensitivity analysis of ResNet-based automatic target recognition performance using MuSES-generated EO/IR synthetic imagery [12529-9]
12529 OB	Lazy table building for high-dimensional look up table generation [12529-10]
	SYNTHETIC DATA GENERATION TOOLS I
12529 OC	Adversarial learning using synthetic IR imagery [12529-12]
12529 OD	A graphical user interface for multi-modal operating condition sampling [12529-13]
12529 OF	Framework for digital twin creation in off-road environments from LiDAR scans [12529-15]

SYNTHETIC DATA GENERATION TOOLS II

	STATILLIC DATA GENERATION TOOLS II
12529 OG	DyViR: dynamic virtual reality dataset for aerial threat object detection [12529-16]
12529 OH	Target modeling capabilities in DEVCOM Aviation and Missile Center scene generation tools [12529-17]
12529 OI	Synthetically generating human-like data for sequential decision-making tasks via reward-shaped imitation learning [12529-18]
12529 OJ	How should simulated data be collected for AI/ML and unmanned aerial vehicles? [12529-113]
	GENERATIVE MODELS FOR SYNTHETIC DATA CREATION
12529 OK	Leveraging synthetic data for AI bias mitigation [12529-21]
12529 OL	Cyber creative GAN for novel malicious packets [12529-23]
	SYNTHETIC DATA FOR MULTI-DOMAIN AI/ML APPLICATIONS: JOINT SESSION WITH CONFERENCES 12529 AND 12538
12529 00	Synthetic data for automatic target recognition from small drones [12529-26]
12529 OP	Multi-agent collaboration environment simulation [12529-27]
12529 0Q	Generation of high-fidelity signatures for AI/ML training database generation [12529-28]
	SYNTHETIC DATA FOR UNMANNED SYSTEMS TECHNOLOGY APPLICATIONS: JOINT SESSION WITH CONFERENCES 12529 AND 12549
12529 OR	Analyzing synthetic datasets through the training and inference domain gap (Invited Paper, Best Presentation Award) [12529-29]
	POSTER SESSION
12529 OT	Zero shot domain adaptation for x-ray baggage scanning (Best Poster Award) [12529-32]
12529 OU	Data generation and separation of AM radio collisions with machine learning [12529-33]
12529 OV	A new deep Q-learning method with dynamic epsilon adjustment and path planner assisted techniques for Turtlebot mobile robot [12529-34]

12529 OY	Leveraging synthetic data for robust gesture recognition [12529-37]
12529 OZ	Leveraging body pose estimation for gesture recognition in human-robot interaction using synthetic data [12529-38]
12529 10	A study on improving realism of synthetic data for machine learning [12529-40]
12529 11	Out-of-distribution 3D object generation for enhanced pose estimation [12529-41]
12529 12	Extending neural radiance fields (NeRF) for synthetic aperture radar (SAR) novel image generation [12529-42]
12529 15	Indecision trees: learning argument-based reasoning under quantified uncertainty [12529-119]
12529 16	Quasi-synthetic data generation for camouflaged object detection at edge [12529-53]

Conference Committee

Symposium Chairs

Tien Pham, The MITRE Corporation (United States) **Douglas R. Droege**, L3Harris Technologies, Inc. (United States)

Symposium Co-chairs

Augustus W. Fountain III, University of South Carolina (United States) **Teresa L. Pace**, L3Harris Technologies, Inc. (United States)

Program Track Chair

David W. Messinger, Rochester Institute of Technology (United States)

Conference Chairs

Christopher L. Howell, DEVCOM C5ISR (United States)
Kimberly E. Manser, DEVCOM C5ISR (United States)
Raghuveer M. Rao, DEVCOM Army Research Laboratory
(United States)

Conference Program Committee

Rama R. Chellappa, University of Maryland, College Park (United States)

Celso De Melo, DEVCOM Army Research Laboratory (United States)

Karen Frech, U.S. Navy (United States)

Leonidas J. Guibas, Stanford University (United States)

Sean Hu, DEVCOM Army Research Laboratory (United States)

Kapil Katyal, Johns Hopkins University Applied Physics Lab., LLC (United States)

Dinesh Manocha, University of Maryland, College Park (United States) and The University of North Carolina at Chapel Hill (United States)

Jamileh Mogin, U.S. Department of Energy (United States)

Priya Narayanan, DEVCOM Army Research Laboratory (United States)

Colin N. Reinhardt, Naval Information Warfare Center Pacific (United States)

Stefano Soatto, University of California, Los Angeles (United States)

Antonio Torralba, Massachusetts Institute of Technology (United States)

Vincent J. Velten, Air Force Research Laboratory (United States)
Bryan I. Vogel, DEVCOM C5ISR (United States)
Lori Westerkamp, Air Force Research Laboratory (United States)
