Volume 6685

Proceedings of SPIE, 0277-786X, v. 6685

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Assimilation of Remote Sensing and In Situ Data in Modern Numerical Weather and Environmental Prediction Models*, edited by Xiaolei Zou, Dale Barker, Francois-Xavier Le Dimet, Proceedings of SPIE Vol. 6685 (SPIE, Bellingham, WA, 2007) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/07/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

DATA ASSIMILATION SYSTEMS AND NEW METHODOLOGIES

- 6685 05 **A lower bound for prediction uncertainty in nowcasting/forecasting models** [6685-04]
J. C. Kerce, Propagation Research Associates, Inc. (USA); F. Vandenberghe, The National Ctr. for Atmospheric Research (USA)

ASSIMILATION OF SATELLITE OBSERVATIONS OF THE ATMOSPHERE

- 6685 08 **Assimilation of AIRS data using a mesoscale model** [6685-07]
M. Carrier, X. Zou, The Florida State Univ. (USA)
- 6685 0A **Assimilation of angle of arrival measurements from an antenna of GPS receivers in the WRF model** [6685-09]
F. Vandenberghe, National Ctr. for Atmospheric Research (USA); C. Kerce, R. Bock, Propagation Research Associates Inc. (USA)

ASSIMILATION OF SATELLITE OBSERVATIONS OF THE OCEAN

- 6685 0B **A three-dimensional variational data assimilation scheme in support of coastal ocean observing systems** [6685-11]
Z. Li, Y. Chao, Jet Propulsion Lab. (USA); J. D. Farrara, X. Wang, Raytheon Intelligence and Information Systems (USA); J. C. McWilliams, K. Ide, Univ. of California, Los Angeles (USA)
- 6685 0C **Assimilation of the high-frequency radar measurements for coastal currents using ROMS** [6685-12]
K. Park, Z. Li, Jet Propulsion Lab. (USA); J. Farrara, Raytheon Technical Services Co. LLC (USA); Y. Chao, Jet Propulsion Lab. (USA)
- 6685 0D **Toward assimilation of ocean colour satellite observation into coastal ocean biogeochemical models: the tropical Fitzroy River Estuary case study** [6685-14]
V. E. Brando, B. J. Robson, N. R. C. Cherukuru, A. G. Dekker, I. T. Webster, Commonwealth Scientific and Industrial Research Organisation (Australia)
- 6685 0E **Pacific Ocean deep sea surface height fluctuation** [6685-15]
T. Holden, P. Marchese, G. Tremberger, Jr., D. Cotten, T. D. Cheung, J. Roman, Queensborough Community College, CUNY (USA)

HURRICANE DATA ASSIMILATION

- 6685 0G **Mesoscale assimilation of rain-affected observations** [6685-17]
C. Amerault, Naval Research Lab. (USA); X. Zou, Florida State Univ. (USA); J. Doyle, Naval Research Lab. (USA)

POSTER SESSION

- 6685 0K **Orographic effects on South China Sea summer climate** [6685-22]
H. Xu, Nanjing Univ. of Information Science & Technology (China); S.-P. Xie, Y. Wang, Univ. of Hawaii (USA); W. Zhuang, D. Wang, South China Sea Institute of Oceanology (China)
- 6685 0L **On the role of western Pacific subtropical high and easterly flows from its south side in May-June precipitation over Fujian province** [6685-23]
Y. Zou, Chinese Academy of Meteorological Sciences (China) and Nanjing Univ. of Information Science and Technology (China); J. He, Nanjing Univ. of Information Science and Technology (China); P. Zhao, Chinese Academy of Meteorological Sciences (China); Z. Qiu, Y. Yang, Fujian Meteorological Bureau (China)
- 6685 0M **Assimilation and simulation of typhoon Bilis(2006) using GRAPES(global and regional assimilation prediction system)** [6685-24]
Y. Liu, J. Xue, D. Chen, Chinese Academy of Meteorological Sciences (China)
- 6685 0O **Retrieving in-cloud vertical profiles of the atmospheric temperature from GPS RO data** [6685-27]
L. Lin, X. Zou, J. O'Connor, J.-C. Chang, L.-B. Chu, The Florida State Univ. (USA)

Author Index

Conference Committee

Conference Chair

Xiaolei Zou, The Florida State University (USA)

Cochairs

Dale Barker, National Center for Atmospheric Research (USA)
Francois-Xavier Le Dimet, Université Joseph Fourier (France)

Program Committee

Kayo Ide, University of California, Los Angeles (USA)
John R. Mecikalski, The University of Alabama/Huntsville (USA)
Michael Navon, Florida State University (USA)
Zhaoxia Pu, The University of Utah (USA)
Qingnong Xiao, National Center for Atmospheric Research (USA)

Session Chairs

- 1 Data Assimilation Systems and New Methodologies
Zhijin Li, Jet Propulsion Laboratory (USA)
- 2 Assimilation of Satellite Observations of the Atmosphere
Clark Amerault, Naval Research Laboratory (USA)
- 3 Assimilation of Satellite Observations of the Ocean
Francois C. Vandenberghe, National Center for Atmospheric Research (USA)
- 4 Hurricane Data Assimilation
Tomislava Vukicevic, Colorado State University (USA)
- 5 Data Assimilation Research and Education at Universities
Xiaolei Zou, The Florida State University (USA)
