SPIE

Volume 7476

Proceedings of SPIE, 0277-786X, v. 7476

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Optics in Atmospheric Propagation and Adaptive Systems XII*, edited by Anton Kohnle, Karin Stein, John D. Gonglewski, Proceedings of SPIE Vol. 7476 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, similar font. To the right of the text is a stylized graphic consisting of three vertical bars of increasing height, resembling a bar chart or a signal waveform.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

v *Conference Committee*

SESSION 1 CHARACTERISATION OF THE PROPAGATION ENVIRONMENT I: MARITIME ENVIRONMENT

- 7476 03 **Measurements of mixing layer height variability during the Ligurian air-sea interaction experiment (LASIE '07)** [7476-01]
J. Förster, Bundeswehr Technical Ctr. for Ships and Naval Weapons (Germany)
- 7476 04 **Influence of atmospheric propagation in the maritime boundary layer on the measured RCS of ships** [7476-02]
H.-H. Fuchs, H. Essen, G. Lindquist, FGAN-Forschungsinstitut für Hochfrequenzphysik und Radartechnik (Germany)
- 7476 05 **Comparison of distance dependence of ship signature and intensity of ship exhaust gas measured in both MWIR and LWIR transmission bands** [7476-03]
A. D. van Rheenen, E. Brendhagen, L. T. Heen, Norwegian Defense Research Establishment (Norway)

SESSION 2 CHARACTERISATION OF THE PROPAGATION ENVIRONMENT II

- 7476 06 **Millimetre wave propagation through vegetation** [7476-04]
H. Essen, D. Nüßler, N. Von Wahl, S. Heinen, FGAN-Forschungsinstitut für Hochfrequenzphysik und Radartechnik (Germany)
- 7476 07 **SWIR sky-glow cloud correlation with NIR and visible clouds: an urban and rural comparison** [7476-06]
D. C. Dayton, Applied Technology Associates (United States); J. D. Gonglewski, C. St. Arnauld, Air Force Research Lab. (United States); I. Mons, D. Burns, Textron Defense Systems Kauai (United States)

SESSION 3 PROPAGATION AND IMAGING THROUGH OPTICAL TURBULENCE I

- 7476 09 **Measurement and prediction of optical turbulence effects as function of altitude in the marine boundary layer** [7476-08]
A. N. de Jong, P. B. W. Schwering, P. J. Fritz, TNO Defence, Security and Safety (Netherlands)
- 7476 0A **Laser speckle and atmospheric scintillation dependence on laser spectral bandwidth** [7476-09]
D. Dayton, Applied Technology Associates (United States); J. Gonglewski, C. St. Arnauld, Air Force Research Lab. (United States)
- 7476 0C **Characterization of a laser beam propagating through the turbulent atmosphere** [7476-11]
F. V. Shugaev, E. N. Terentiev, L. S. Shtemenko, O. I. Dokukina, T. A. Petrova, M. V. Lomonosov Moscow State Univ. (Russian Federation)

SESSION 4 PROPAGATION AND IMAGING THROUGH OPTICAL TURBULENCE II

- 7476 OD **Turbulence characterization by studying laser beam wandering in a differential tracking motion setup** [7476-12]
D. G. Pérez, Pontificia Univ. Católica de Valparaíso (Chile); L. Zunino, Ctr. de Investigaciones en Ópticas A.C. (Argentina) and Univ. Nacional de La Plata (Argentina); D. Gulich, G. Funes, Ctr. de Investigaciones en Óptica, A.C. (Argentina); M. Garavaglia, Univ. Nacional de la Plata (Argentina)
- 7476 OE **Statistical behavior of atmospheric turbulence at the Teide Observatory** [7476-13]
B. García-Lorenzo, J. J. Fuensalida, Instituto de Astrofísica de Canarias (Spain) and Univ. de La Laguna (Spain); J. A. Castro-Almazán, Instituto de Astrofísica de Canarias (Spain); M. A. C. Rodríguez-Hernández, Instituto de Astrofísica de Canarias (Spain) and Univ. de La Laguna (Spain)
- 7476 OF **Estimation of adaptive optics parameters from wind speed: results for the Teide Observatory** [7476-14]
B. García-Lorenzo, Instituto de Astrofísica de Canarias (Spain) and Univ. de La Laguna (Spain); A. Eff-Darwich, Univ. de La Laguna (Spain); J. J. Fuensalida, Instituto de Astrofísica de Canarias (Spain) and Univ. de La Laguna (Spain); J. A. Castro-Almazán, Instituto de Astrofísica de Canarias (Spain)

SESSION 5 MITIGATION OF ATMOSPHERIC EFFECTS AND SYSTEM PERFORMANCE I: SYSTEMS

- 7476 OH **Wavefront modifier with integrated sensor** [7476-16]
M. Griffith, L. Laycock, D. Rowe, L. Cairns, BAE Systems (United Kingdom)
- 7476 OI **Progress on the development of a zonal bimorph deformable mirror** [7476-17]
M. Griffith, L. Laycock, N. Archer, I. Sardharwalla, BAE Systems (United Kingdom); R. Myers, Durham Univ. (United Kingdom); P. Doel, Univ. College London (United Kingdom)
- 7476 OJ **Adaptive optics concepts and systems for multipurpose applications at near horizontal line of sight: developments and results** [7476-18]
G. Marchi, C. Scheifling, FGAN-FOM (Germany)
- 7476 OK **Two-channel wavefront sensor arrangement employing moiré deflectometry** [7476-19]
S. Rasouli, Institute for Advanced Studies in Basic Sciences (Iran, Islamic Republic of); A. N. Ramaprakash, H. K. Das, C. V. Rajarshi, Inter-Univ. Ctr. for Astronomy and Astrophysics (India); Y. Rajabi, M. Dashti, Institute for Advanced Studies in Basic Sciences (Iran, Islamic Republic of)

SESSION 6 MITIGATION OF ATMOSPHERIC EFFECTS AND SYSTEM PERFORMANCE II: TECHNIQUES AND APPLICATION

- 7476 OL **Wavefront sensors for adaptive optical systems (Invited Paper)** [7476-20]
V. P. Lukin, Institute of Atmospheric Optics (Russian Federation) and Tomsk State Univ. (Russian Federation); N. N. Botygina, O. N. Emaleev, P. A. Konyaev, Institute of Atmospheric Optics (Russian Federation)

- 7476 0M **Modal phase correction for large-aperture ground-based telescope with multiguide stars**
[7476-21]
L. A. Bolbasova, V. P. Lukin, Institute of Atmospheric Optics (Russian Federation) and Tomsk State Univ. (Russian Federation)
- 7476 0N **Reliability of detecting optical vortex with a Shack-Hartmann wavefront sensor in a scintillated vortex beam** [7476-22]
M. Chen, C. Dainty, National Univ. of Ireland, Galway (Ireland)
- 7476 0O **Experimental detection of phase singularities using a Shack-Hartmann wavefront sensor**
[7476-23]
K. Murphy, R. Mackey, C. Dainty, National Univ. of Ireland, Galway (Ireland)
- 7476 0P **Study of the rationality upon adopting a two-level model to deal with interaction between a long-pulse, circularly-polarized laser and sodium atoms** [7476-24]
L. Ke, Y. Li, Institute of Applied Physics and Computational Mathematics (China)

POSTER SESSION

- 7476 0Q **Development of an adaptive optics system for fast automatic control of laser beam jitters in air** [7476-25]
S. Grasso, Univ. degli Studi di Roma Tre (Italy); F. Acernese, R. Romano, F. Barone, Univ. degli Studi di Salerno (Italy) and INFN (Italy)

Conference Committee

Symposium Chairs

Steven P. Neeck, NASA Headquarters (United States)
Karin Stein, Forschungsgesellschaft für Angewandte
Naturwissenschaften e.V. (Germany)

Conference Chairs

Anton Kohnle, Forschungsgesellschaft für Angewandte
Naturwissenschaften e.V. (Germany)
Karin Stein, Forschungsgesellschaft für Angewandte
Naturwissenschaften e.V. (Germany)
John D. Gonglewski, Air Force Research Laboratory (United States)

Program Committee

David C. Dayton, Applied Technology Associates (United States)
Denis Dion, Jr., Defence Research and Development Canada
(Canada)
Stephen M. Hammel, Space and Naval Warfare Systems Center,
San Diego (United States)
Vladimir P. Lukin, Institute of Atmospheric Optics (Russian Federation)
Charles L. Matson, Air Force Research Laboratory (United States)
Sergio R. Restaino, Naval Research Laboratory (United States)
Jennifer C. Ricklin, Defense Advanced Research Projects Agency
(United States)
Jim F. Riker, Air Force Research Laboratory (United States)
Marc J. F. Séchaud, ONERA (France)
Mikhail A. Vorontsov, Army Research Laboratory (United States)

Session Chairs

- 1 Characterisation of the Propagation Environment I: Maritime Environment
Karin Stein, Forschungsgesellschaft für Angewandte
Naturwissenschaften e.V. (Germany)
- 2 Characterisation of the Propagation Environment II
Anton Kohnle, Forschungsgesellschaft für Angewandte
Naturwissenschaften e.V. (Germany)

- 3 Propagation and Imaging through Optical Turbulence I
Marc J. F. Séchaud, ONERA (France)
- 4 Propagation and Imaging through Optical Turbulence II
Marc J. F. Séchaud, ONERA (France)
- 5 Mitigation of Atmospheric Effects and System Performance I: Systems
David C. Dayton, Applied Technology Associates (United States)
- 6 Mitigation of Atmospheric Effects and System Performance II:
Techniques and Application
John D. Goglewski, Air Force Research Laboratory (United States)
