Volume 8028

Proceedings of SPIE, 0277-786X, v. 8028

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Fiber Optic Sensors and Applications VIII*, edited by Stephen J. Mihailov, Henry H. Du, Gary Pickrell, Anbo Wang, Alexis Mendez, Eric Udd, Proceedings of SPIE Vol. 8028 (SPIE, Bellingham, WA, 2011) Article CID Number.

ISSN 0277-786X

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

ix *Conference Committee*

SESSION 1 EVANESCENT FIELD SENSING, LONG PERIOD GRATINGS, STRUCTURED FIBERS

- 8028 02 **Polarization properties of tilted fiber Bragg gratings for novel sensing modalities (Invited Paper)** [8028-01]
J. Albert, L.-Y. Shao, A. Beliaev, Carleton Univ. (Canada); C. Caucheteur, Faculté Univ. de Mons (Belgium)
- 8028 03 **Chiral fiber sensors for harsh environments (Invited Paper)** [8028-02]
V. I. Kopp, J. Singer, D. Neugroschl, Chiral Photonics, Inc. (United States); A. Z. Genack, Chiral Photonics, Inc. (United States) and Queens College (United States)
- 8028 05 **Sensitive fluorescence detection with microstructured optical fibers** [8028-04]
E. P. Schartner, H. Ebendorff-Heidepriem, T. M. Monro, The Univ. of Adelaide (Australia)

SESSION 2 FIBER OPTIC SENSING IN HARSH ENVIRONMENTS

- 8028 07 **Thermally regenerated fiber Bragg gratings in twin-air-hole microstructured fibers for high temperature pressure sensing (Invited Paper)** [8028-06]
T. Chen, R. Chen, C. Jewart, B. Zhang, Univ. of Pittsburgh (United States); J. Canning, K. Cook, The Univ. of Sydney (Australia); K. P. Chen, Univ. of Pittsburgh (United States)
- 8028 08 **High speed measurements using fiber-optic Bragg gratings (Invited Paper)** [8028-07]
J. Benterou, C. May, Lawrence Livermore National Lab. (United States); E. Udd, Columbia Gorge Research (United States); S. J. Mihailov, P. Lu, Communications Research Ctr. Canada (Canada)
- 8028 09 **Study of blast event propagation in different media using a novel ultrafast miniature optical pressure sensor** [8028-08]
X. Zou, N. Wu, Y. Tian, H. Zhang, C. Niezrecki, X. Wang, Univ. of Massachusetts Lowell (United States)

SESSION 3 FIBER BRAGG GRATINGS FOR SENSING

- 8028 0A **Advanced spectral fiber optic sensor systems and their application in energy facility monitoring (Invited Paper)** [8028-09]
R. Willsch, W. Ecke, Institute of Photonic Technology (Germany); T. Bosselmann, M. Willsch, Siemens AG (Germany); H. Bartelt, E. Lindner, Institute of Photonic Technology (Germany)

- 8028 0C **Draw tower fiber Bragg gratings and their use in sensing technology** [8028-11]
E. Lindner, Institute of Photonic Technology (Germany) and Fibre Bragg Grating Sensors Technologies GmbH (Germany); J. Mörbitz, C. Chojetzki, Fibre Bragg Grating Sensors Technologies GmbH (Germany); M. Becker, S. Brückner, K. Schuster, M. Rothhardt, H. Bartelt, Institute of Photonic Technology (Germany)
- 8028 0D **Automatic fiber Bragg grating fabrication system for mass production** [8028-12]
Y. Wang, J. Gong, B. Dong, D. Y. Wang, A. Wang, Virginia Polytechnic Institute and State Univ. (United States)
- 8028 0E **Innovative use of embedded FBG sensors in civil engineering and other applications (Invited Paper)** [8028-13]
G. Nosenzo, Monitor Optics Systems (Ireland)
- 8028 0G **A 40 ksamples/sec spectrometer based FBG interrogator capable of simultaneously measuring more than 16 FBG sensors** [8028-15]
J. P. Vermeiren, J. L. Bentell, D. De Gaspari, D. Uwaerts, P. Verbeke, Xenics NV (Belgium); J. Vlekken, FOS&S (Belgium)
- 8028 0H **A discrete liquid level sensor based on fiber Bragg grating** [8028-16]
D. Song, J. Zou, L.C. Pegasus Corp. (United States); D. Low, J. Armando, Con Edison (United States); T. Kosicka, H. Cui, L.C. Pegasus Corp. (United States)

SESSION 4 NOVEL SENSING FIBER OPTIC SENSING TECHNIQUES

- 8028 0I **Fiber laser sensors: enabling the next generation of miniaturized, wideband marine sensors (Invited Paper)** [8028-17]
G. A. Cranch, G. A. Miller, C. K. Kirkendall, U.S. Naval Research Lab. (United States)
- 8028 0J **Surface scattering plasmon resonance fibre sensors: demonstration of rapid influenza A virus detection** [8028-18]
A. François, J. Boehm, The Univ. of Adelaide (Australia); S. Y. Oh, T. Kok, Institute of Medical and Veterinary Science (Australia); T. M. Monro, The Univ. of Adelaide (Australia)

SESSION 5 NOVEL MICRO-OPTIC DEVICES AND SENSING APPLICATIONS

- 8028 0K **Optical efficiency in metal-lined capillary waveguide Raman sensors** [8028-19]
S. Biedrzycki, M. Buric, J. Falk, National Energy Technology Lab. (United States) and Univ. of Pittsburgh (United States); S. Woodruff, National Energy Technology Lab. (United States)
- 8028 0L **Position determination and monitoring of disturbance along distributed fiber optic sensors** [8028-20]
H. Wu, H. Xu, C. Wang, D. Zhao, Fudan Univ. (China)
- 8028 0N **Test of a novel miniature blood pressure sensor in the coronary arteries of a swine model** [8028-22]
N. Wu, K. Sun, X. Zou, Univ. of Massachusetts Lowell (United States); K. Barringhaus, Univ. of Massachusetts Medical School (United States); X. Wang, Univ. of Massachusetts Lowell (United States)

8028 0O **Optoacoustic fiber optic interferometric sensors for biomedical applications** [8028-23]
D. Gallego, H. Lamela, Univ. Carlos III de Madrid (Spain)

8028 0P **Continuous monitoring of plant growth using fiber-optic interferometric sensing** [8028-24]
J. Chatterjee, B. G. Grossman, Florida Institute of Technology (United States)

POSTER SESSION

8028 0Q **Computational analysis and considerations of an optical fiber sensor with multiple cladding**
[8028-25]
J. A. Betancur, EAFIT Univ. (Colombia)

8028 0R **A research on polarization effects in a distributed optical fiber sensor disturbance location
system** [8028-26]
H. Xu, H. Wu, Fudan Univ. (China); Z. Qiao, Jiangsu Zhengben Water Purification Technology
Co., Ltd. (China); Q. Xiao, Fudan Univ. (China)

8028 0S **A novel frequency-domain location method based on phase generated carrier** [8028-27]
H. Xu, Q. Xiao, Fudan Univ. (China); Z. Qiao, Jiangsu Zhengben Water Purification
Technology Co, Ltd. (China); H. Wu, Fudan Univ. (China)

8028 0V **Fast and accurate determination of the detergent efficiency by optical fiber sensors**
[8028-31]
M. Patitsa, H. Pfeiffer, M. Wevers, Katholieke Univ. Leuven (Belgium)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chairs

Stephen J. Mihailov, Communications Research Centre Canada
(Canada)

Henry H. Du, Stevens Institute of Technology (United States)

Gary Pickrell, Virginia Polytechnic Institute and State University
(United States)

Conference Cochairs

Anbo Wang, Virginia Polytechnic Institute and State University
(United States)

Alexis Mendez, MCH Engineering LLC (United States)

Eric Udd, Columbia Gorge Research (United States)

Program Committee

Christopher S. Baldwin, Aither Engineering, Inc. (United States)

Ole Bang, Technical University of Denmark (Denmark)

Eric A. Bergles, BaySpec, Inc. (United States)

Jeff Bush, Optiphase, Inc. (United States)

Kevin P. Chen, University of Pittsburgh (United States)

Steven D. Christesen, U.S. Army Edgewood Chemical Biological Center
(United States)

Brian Culshaw, University of Strathclyde (United Kingdom)

Abdessama Elyamani, Northrop Grumman Navigation Systems
(United States)

Yoel Fink, Massachusetts Institute of Technology (United States)

Eric Goldner, US Sensor Systems Inc. (United States)

Tom W. Graver, Micron Optics, Inc. (United States)

Ming Han, University of Nebraska-Lincoln (United States)

Hajime Haneda, National Institute for Materials Science (Japan)

Kazuo Hotate, The University of Tokyo (Japan)

Jiri Kanka, Institute of Photonics and Electronics of the ASCR, v.v.i.
(Czech Republic)

Victor I. Kopp, Chiral Photonics, Inc. (United States)
Katerina Krebber, Bundesanstalt für Materialforschung und -prüfung
(Germany)
Steven T. Kreger, Luna Innovations Inc. (United States)
David A. Krohn, Light Wave Venture Consulting, LLC (United States)
Paul Lefebvre, LxDATA (Canada)
Thomas D. Monte, KVH Industries, Inc. (United States)
Glen A. Sanders, Honeywell Technology (United States)
Svetlana A. Sukhishvili, Stevens Institute of Technology (United States)
Dennis J. Trevor, OFS Laboratories (United States)
Xingwei Wang, University of Massachusetts Lowell (United States)
Reinhardt Willsch, Institut für Photonische Technologien, Jena
(Germany)
Younan Xia, Washington University in St. Louis (United States)
Hai Xiao, Missouri University of Science and Technology (United States)

Session Chairs

- 1 Evanescent Field Sensing, Long Period Gratings, Structured Fibers
Stephen J. Mihailov, Communications Research Centre Canada
(Canada)
- 2 Fiber Optic Sensing in Harsh Environments
Henry H. Du, Stevens Institute of Technology (United States)
- 3 Fiber Bragg Gratings for Sensing
Gary Pickrell, Virginia Polytechnic Institute and State University
(United States)
Stephen J. Mihailov, Communications Research Centre Canada
(Canada)
- 4 Novel Sensing Fiber Optic Sensing Techniques
Gary Pickrell, Virginia Polytechnic Institute and State University
(United States)
- 5 Novel Micro-optic Devices and Sensing Applications
Gary Pickrell, Virginia Polytechnic Institute and State University
(United States)
